

# Bureau of Information Technology Warns of Phishing Scam

*A release from the Governor's Office ♦ Contact Janna Fernandez at 475-9309 or [Janna.Fernandez@Guam.gov](mailto:Janna.Fernandez@Guam.gov)*

## **Emails Sent to Employees:**

In an attempt to protect government of Guam employees and their log in information, the Bureau of Information Technology sent an email warning all government employees of a “phishing” scam. An email fraudulently and erroneously signed by Governor Eddie Baza Calvo is circulating attempting to obtain email account log in information. The email did not come from Governor Calvo.

## **Tips to Keep your Accounts Secure:**

BIT offers the following suggestions to protect yourself, your information and your accounts from “phishing” scams:

- If you happen to have responded to a “phishing” email, log in to your account and change your password immediately.
- Be sure to keep in contact with your network server support staff, or the Department of Administration's Data Processing staff, if you notice any changes in your account.
- Be wary of suspicious emails from people you might not know asking for information that is considered private, like passwords, credit card numbers, and Social Security numbers.
- Check and validate the sender email address. All GovGuam executive branch agencies and email accounts end with .GOV.

If you are suspect of an email you've received, send them to [helpdesk@doa.guam.gov](mailto:helpdesk@doa.guam.gov), and call 475-1229/1203.
