Some FACTUAL information about Plan B, or the "morning after" pill:

Emergency contraception that works by temporarily delaying ovulation: Similar to birth control pills, Plan B works by temporarily delaying the release of an egg from the ovary, so there's no egg to meet the sperm. No egg, no fertilization, no pregnancy.

<https://www.planbonestep.com/how-plan-b-works/>

Plan B PREVENTS pregnancy - thereby, preventing the need for abortion. '

Get your facts straight, Pete.
