Hafa Adai John,

You can read the comments yourself at:

<https://www.facebook.com/guambwa/>

It is important to note that the Plan B pill is NOT an "abortion pill" as some are apparently claiming. This pill prevents pregnancy in the same way as birth control pills - it prevents the release of the egg so that it cannot be fertilized. Preventing pregnancy also prevents the need for abortion. If you do a story on this, please be a responsible and factual reporter: Do not just print what someone "claims" about the Plan B pill without also clarifying the actual facts surrounding this over-the-counter pill. There are myriad sources on the internet about the Plan B pill. You could also call a local OB/GYN as well.

Thank you.
