EXECUTIVE ORDER NO. 2023-05

**RELATIVE TO EMERGENCY PROCUREMENT
AUTHORIZATION DURING THE STATE OF EMERGENCY IN
RESPONSE TO TYPHOON MAWAR**

WHEREAS, on May 21, 2023, I issued Executive Order No. 2023-02 in anticipation of the approach of Tropical Storm Mawar and on May 22, 2023, at my request, President Joseph R. Biden issued Emergency Declaration FEMA-3594-EM; and

WHEREAS, on May 22, 2023, Tropical Storm Mawar was upgraded to a typhoon. On May 23, 2023, Typhoon Mawar was upgraded to a Category 4 typhoon, and in response to this intensification, I issued Executive Order No. 2023-03, ordering the evacuation of residents in low lying, coastal and flood prone areas; and

WHEREAS, on May 24, 2023, Typhoon Mawar made landfall on Guam, with sustained winds of 140 mph and gusts up to 170 mph. Typhoon Mawar maintained its intensity as it passed through the Rota Channel between Guam and Rota, with destructive typhoon force winds continuing through May 25, 2023. On May 25, 2023, at my request, President Biden issued Major Disaster Declaration FEMA-4715-DR; and

WHEREAS, Typhoon Mawar represents the closest impact of any typhoon of this magnitude on our island in over twenty (20) years, and caused substantial damage to our island; and

WHEREAS, aggressive recovery efforts are currently under way. The Guam Power Authority ("GPA") has worked tirelessly to restore power to our island, which in turn will support other critical recovery efforts. Presently, nearly all our substations have been restored, as well as a majority of our feeder stations. Power has been restored to communities surrounding substations and high priority services such as hospitals and clinics, and these efforts will enable GPA to restore power to our neighborhoods more broadly; and

WHEREAS, the loss of consistent access to island power has unfortunately slowed recovery of our water and wastewater systems, causing water pumping stations to shut down, and the island-wide water distribution system to fail. This resulted in an island-wide loss of water service, which is in the process of being restored; and

WHEREAS, on June 3, 2023, I issued Executive Order No. 2023-04, declaring a state of emergency due to the public water supply shortage as a result of Typhoon Mawar, to activate 9 GCA § 55.60, preventing the excessive use of water for purposes such as water-blasting and car-washing, to allow reservoir levels to build and provide service to members of our community who do not currently have water; and

WHEREAS, Typhoon Mawar also resulted in substantial storm debris, including extensive green waste, which consists of organic vegetative matter such as leaves, fallen trees, limbs, stumps, branches, and yard waste; and

ISLAND OF GUAM
OFFICE OF THE GOVERNOR
HAGATNA, GUAM 96932
U.S.A.

WHEREAS, the accumulation of green waste creates a breeding ground for invasive species and vermin, posing a significant environmental hazard; and

WHEREAS, decaying vegetative waste also threatens the health, safety, and welfare of our community by preventing the safe passage of residents from their homes, as well as the passage of utility vehicles attempting to restore water and power services to our villages; and

WHEREAS, on May 31, 2023, I signed Bill No. 127-37 into Public Law 37-17, which authorizes the use of up to Fifty Million Dollars (\$50,000,000) from the General Fund for emergency response expenses; and

WHEREAS, while the state of emergency declared in E.O. No. 2023-02 remains in effect, and emergency procurements authorized therein continue to be authorized, and while emergency procurements not expressly provided in E.O. No. 2023-02 may be processed pursuant to 5 GCA § 5215, in the interest of expediting broader categories of emergency procurements, it is prudent to authorize emergency procurement and emergency expense categories to respond to the state of emergency declared in E.O. No. 2023-02 that align with the categories identified by the Legislature in P.L. No. 37-17.

NOW, THEREFORE, I, LOURDES A. LEON GUERRERO, *I Maga'hågan Guåhan*, Governor of Guam, and by virtue of the authority vested in me by the Organic Act of Guam, as amended, and the laws of Guam, do order as follows:

1. **State of Emergency continues.** The state of emergency declared in Executive Order No. 2023-02 in response to the approach of Tropical Storm Mawar (now Typhoon Mawar) remains in effect.
2. **Emergency Procurement and Emergency Expenses.** In addition to the categories of procurements authorized in E.O. No. 2023-02, pursuant to Section 5215 of Title 5, Guam Code Annotated, authorizing emergency procurement upon executive order, and Section 22402 of Title 5, Guam Code Annotated, I hereby authorize emergency procurement for emergency response expenses in response to Typhoon Mawar, including but not limited to procurements related to safety and security; food, water, and sheltering; health and medical; energy; communications; transportation; and hazardous materials, in excess of initial expenditure amounts identified in E.O. No. 2023-02. Procurements in furtherance of emergency efforts of the Guam Power Authority and Guam Waterworks Authority to restore utilities to our community, and procurements in furtherance of typhoon debris removal, are expressly authorized herein. All other provisions of Executive Order No. 2023-02 remain in place.
 - (a) Emergency procurement of goods and services relative to this Executive Order shall comply with the further requirements provided in 5 GCA Section 5215.

ISLAND OF GUAM
OFFICE OF THE GOVERNOR
HAGATNA, GUAM 96932
U.S.A.

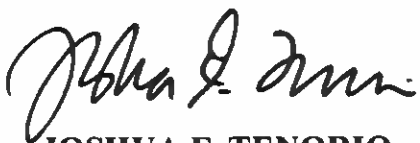

(b) As provided in Section 5215, the effective period for emergency procurements made pursuant to this order shall be for a ninety (90) day period immediately following the date of the Determination of Need for Emergency Procurement. Procurements made under the prior authorization provided in E.O. No. 2023-02, authorized therein for an effective period of thirty (30) days, may be extended for an additional period of sixty (60) days following the date of the Determination of Need for Emergency Procurement. Any further extensions shall comply with the requirements of Section 5215(e).

3. **Authorization for Overtime.** The authorization in E.O. No. 2023-02 for payment of overtime, for exempt and non-exempt Government of Guam employees, to work in excess of forty (40) hours a week in order to mitigate and respond to the effects of Typhoon Mawar throughout Guam remains in effect, for amounts in excess of initial expenditure amounts identified in E.O. No. 2023-02.
4. **Documentation of Expenses.** All departments and agencies are reminded to keep appropriate documentation on all emergency expenses incurred pursuant to this Executive Order for inspection by the Executive and Legislative Branches and by the Public Auditor of Guam, and in anticipation of federal disaster assistance approval by the President of the United States to be administered by the Federal Emergency Management Agency.

SIGNED AND PROMULGATED at Hagåtña, Guam, this **6th** day of **June, 2023**.

Maga'hågan Guåhan
Governor of Guam

Attested by:

JOSHUA F. TENORIO
Sigundo Maga'låhen Guåhan
Lt. Governor of Guam

ADDITIONAL REQUIREMENT FOR:

AIR CURTAIN BURNER; GREEN WASTE & CLEAN WOOD WASTE

Agriculture as a result of invasive species and the threat they pose to public health and environmental destruction Agriculture requires the following:

1. No green waste debris is allowed to leave any of the sites designated in each of the villages to any private individual, govt agency or commercial establishment until it has gone through the compost/mulching/ shredding process.

Once it has been deposited into these approved FEMA holding sites, only the awarded contractor is allowed to transport untreated green waste debris directly to the processing centers for treatment.

2. Compost and Mulching conducted by the awarded bio mass company(s) must meet CCOM and CCP standards or at least processes and holds Compost/Mulch for a minimum of at least 135° not to exceed 160° to properly destroy and kill Rhino Beetles and Little Fire Ants and other pests in the piles and mounds. Piles and mounds should not exceed a height that makes it difficult to properly mix and turn the Compost/Mulch for proper breakdown and standards identifying as Compost/Mulch.

3. No compost/Mulch can be allowed to leave the processing facility to private individuals, government, and commercial establishment without being mixed/turned for at least 3 hours prior to ensure that the heat generated in the interior to circulate to outward areas of the pile/mounds that could contain invasives listed above.

4. The Department of Agriculture and the Mayors Council shall be reserved up to 30% of the total amount of composted/mulched green waste material.

5. Tekken (Chamoru) fishing nets shall be used to cover piles/mounds sitting for long periods of time, with dimensions of 1" knot to knot made of .25mm nylon filament. These piles/mounds must also too meet the specs of 3 hour wait time with mix/turn to allow heat to kill any invasives.

DECLARATION RE COMPLIANCE WITH 5 GCA §5150

I, Charles Esteves, make this declaration on June 01, 2023

regarding Procurement No. _____ and do hereby certify under penalty of perjury that:

(1) I am the procurement officer (Chief Procurement Officer; Director of Public works; or head of a purchasing agency) for this procurement;

(2) I have caused an estimate to be made of the cost of the services or supplies being procured, and for which a contract will be entered into or a purchase order will be issued, whichever is appropriate as the case may be;

(3) My estimate of the total cost of the contract or purchase order, whichever is appropriate as the Case may be, is

() less than \$500,000; or

(xxx) \$500,000 or more;

(4) If the total estimated cost of the procurement is \$500,000 or more, I understand that I must be advised by legal counsel designated by the Attorney General (which may be an Assistant Attorney General or other legal counsel designated as Special Assistant General ("SAAG") under 5 GCA § 5150) during each and every phase of the procurement process, beginning with the planning stage and before any request for proposal or invitation to bid is issued or notice published, or before any sole source procurement is undertaken;

(5) If the total estimated cost of the procurement is \$500,000 or more, I understand I may not proceed with any phase of the procurement unless I have been advised by an Assistant Attorney General or a SAAG to proceed;

(6) If the total estimated cost of the procurement is less than \$500,000 Initially when the procurement is begun, but the total cost increases to \$500,000 or more at some later point in time, I understand I must contact the Attorney General's Office as soon as I become aware that the procurement will actually cost \$500,000 or more, and that I may not proceed further without the assistance of the Attorney General's Office or a SAAG; and

(7) I understand if I do not comply with the requirements of 5 GCS § 5150 and the Attorney General's Office or a SAAG has not acted as legal counsel during all phases of a procurement estimated to cost \$500,000 or more, the Attorney General or SAAG may disapprove the contract, or the procurement may be subject to cancellation, or any award, contract or purchase order made or entered into may be subject to termination.

DETERMINATION OF NEED FOR EMERGENCY PROCUREMENT

DATE: JUNE 9, 2023

AGENCY: GUAM HOMELAND SECURITY/OFFICE OF CIVIL DEFENSE

RE: TYPHOON MAWAR – VEGETATIVE GREEN WASTE DISPOSAL
AND AIR CURTAIN BURNER

WHEREAS, on May 20, 2023, the Governor of Guam issued Executive Order No. 2023-02 declaring a State of Emergency in anticipation of the approach of Tropical Storm Mawar; and

WHEREAS, over the next several days, Tropical Storm Mawar intensified and became a Category 4 Typhoon before passing over Guam on May 24, 2023; and

WHEREAS, the passage of Typhoon Mawar created an extensive storm debris field all over the entire island of Guam, much of which consists of organic vegetative matter such as leaves, fallen trees, limbs, stumps, branches, and yard waste (aka "green waste"); and

WHEREAS, the enormous piles and scattered areas of decaying vegetative green waste threaten the health, safety, and welfare of the public by preventing the safe passage of residents from their homes and by creating a noxious environmental hazard that serves as a breeding ground for invasive species and vermin; and

WHEREAS, it is critical that the immediate removal, disposal, and incineration of the green waste be prioritized in order to eliminate the imminent threat posed to public health, safety, and welfare; and to ensure the orderly restoration of the community; and

WHEREAS, on May 31, 2023, Public Law 37-17 was enacted which authorizes the use of up to Fifty Million Dollars (\$50,000,000.00) from the General Fund for Typhoon Mawar emergency response expenses with the anticipation that the expenses shall be reimbursable by the federal government; and

WHEREAS, the Governor's Executive Order No. 2023-02 authorizes emergency procurement up to a combined total maximum of Two Hundred Fifty Thousand Dollars (\$250,000.00); and

WHEREAS, the Governor's Executive Order No. 2023-05 expands Executive Order No. 2023-02 and expressly authorizes the emergency procurement of emergency response expenses in excess of the initial \$250,000.00 for expenses including and not limited to, among other things, procurements related to the restoration of utilities by Guam Power Authority and Guam Waterworks Authority and procurements in furtherance of typhoon debris removal; and

WHEREAS, as required by Title 5 GCA Section 5150, the Guam Homeland Security/Office of Civil Defense and the General Services Agency (GSA) have consulted with the Office of the Attorney General of Guam with respect to the form and legality of any emergency procurements estimated to result in an award of \$500,000.00 or more.

DETERMINATION

1. Based on the foregoing, the undersigned does hereby DETERMINE that as a direct consequence of the aftermath and conditions resulting from Typhoon Mawar, there exists in Guam an imminent threat to public health, safety and welfare and to the health and safety of the environment, which could not have been foreseen through the use of reasonable and prudent management or procurement procedures, and which cannot be addressed by other procurement methods of source selection.

2. The threat is imminent, present, and continuing. Emergency procurement as authorized by Title 5 GCA Section 5215 and Executive Order Nos. 2023-02 and 2023-95 is necessary without delay to procure equipment and services relative to the immediate removal, disposal, and incineration of the decaying vegetative green waste and debris left behind by Typhoon Mawar, including but not limited to an air burner curtain; and to thereby ensure the safeguard and protection of public health, welfare, and safety, and to the health and safety of the environment.

3. The undersigned affirms solemnly that the described Typhoon Mawar emergency conditions and the related emergency procurement of equipment and services relative to the immediate removal, disposal, and incineration of the vegetative green waste, including an air burner curtain and any necessary related supplies, services or emergency construction works, is not being used and will not be used, directly or indirectly, to avoid other methods of source selection or the purposes and policies of the Guam Procurement Law.

4. This Determination of Need is based on the assessments, reports, research, price quotations, and advice given to GSA by Guam Homeland Security/Office of Civil Defense and the agencies and officials of the Government of Guam; and

5. Copies of the Governor's Executive Order Nos. 2023-02 and 2023-05 are attached to this Determination of Need and shall be made a part of any purchase order, contract, or Notice of Award that may be made or given thereunder, and further shall be a material part of the procurement record.

Pursuant to 6 GCA Section 4308, I declare under penalty of perjury that the foregoing is true and correct.

Executed on the 9th day of June, 2023.

DAFNE MANSAPIT SHIMIZU
Acting Chief Procurement Officer
for Guam General Services Agency

COUNTERSIGNED AS CONCURRING:

CHARLES ESTEVES

Administrator
Guam Homeland Security/Office of Civil Defense

**ISLAND OF GUAM
OFFICE OF THE GOVERNOR
HAGATNA, GUAM 96932
U.S.A.**

EXECUTIVE ORDER NO. 2023-02

**RELATIVE TO DECLARING A STATE OF EMERGENCY IN
ANTICIPATION OF THE APPROACH OF TROPICAL STORM
MAWAR**

WHEREAS, on May 21, 2023, the National Weather Service, Guam Weather Forecast Office ("NWS"), forecast that Tropical Storm Mawar (formerly Tropical Depression 02W), which is located approximately 570 miles south-southeast of Guam, is steadily intensifying and maintaining a track toward Guam and the Mariana Islands; and

WHEREAS, while a Typhoon Watch remains in effect for Guam, projecting the possibility of damaging winds of 39 mph or more within 48 hours, NWS states that there is a high likelihood for Tropical Storm to Typhoon impacts, with possible winds up to 74 mph, and heavy rainfall of at least 5-9 inches throughout the Marianas. Tropical Storm Mawar is expected to further intensify into a typhoon by the time it arrives in our region. Tropical-Storm-Force winds are presently anticipated from early Tuesday, May 23, 2023 through late Wednesday, May 24, 2023, and dangerous surf is possible as early as Monday, May 22, 2023; and

WHEREAS, on Saturday, May 20, 2023 at 1:00 p.m., I placed the island in Condition of Readiness 3, in anticipation of damaging winds and rains within forty-eight (48) hours. At 8:00 p.m. on May, 21, 2023, I placed the island in Condition of Readiness 2; and

WHEREAS, based upon current forecasts and modeling, the strength and track of Tropical Storm Mawar represent an imminent, credible, and significant threat to the health, safety and welfare of Guam; and

WHEREAS, in anticipation of Mawar's closest approach, the Offices of Homeland Security and Civil Defense ("GHS/OCD") and other territorial agencies are instructed to take precautionary and proactive steps in order to secure the safety of the island and to reduce the potential destruction of property and loss of life; and

WHEREAS, an emergency situation exists such that in order to safeguard the community, critical infrastructure, and the general welfare of the island against the impending dangerous onset of destructive winds and rains forecast to strike Guam, it is critical that timely precautions be taken and resources be immediately identified, mobilized and deployed as contemplated in the GHS/OCD-FEMA 2018 Guam Catastrophic Typhoon Plan and in the 2016 Guam Comprehensive Emergency Management Plan.

ISLAND OF GUAM
OFFICE OF THE GOVERNOR
HAGATNA, GUAM 96932

NOW, THEREFORE, I, LOURDES A. LEON GUERRERO, *I Maga'hågan Gudhan*, Governor of Guam, and by virtue of the authority vested in me by the Organic Act of Guam, as amended, and the laws of Guam, do order as follows:

- 1. Declaration of State of Emergency.** A state of emergency is hereby declared for the island of Guam in anticipation of the approach of Tropical Storm Mawar.
- 2. Emergency Procurement and Emergency Expenses.** Pursuant to Section 5215 of Title 5, Guam Code Annotated, authorizing emergency procurement upon executive order, and § 22402 of Title 5, Guam Code Annotated, I hereby authorize overtime and emergency procurement for heavy equipment rental, debris removal, nursing and medical support services for the North and Southern Community Health Centers, Guam Department of Education typhoon shelter operations, lodging for displaced residents, and the purchase of supplies, materials, goods, services or other expenditures, up to a combined total maximum of Two Hundred Fifty Thousand Dollars (\$250,000.00).
- 3. GHS/OCD to be Lead Agency; Purpose of Emergency Procurement.** GHS/OCD shall be the lead agency for the emergency procurement of any goods and services relative to this Executive Order, the effective period of which shall be for thirty (30) days as provided in § 5215 of Title 5, Guam Code Annotated.
- 4. Authorization for Overtime.** I further authorize the payment of overtime, for exempt and non-exempt Government of Guam employees, to work in excess of forty (40) hours a week in order to mitigate and respond to the effects of Tropical Storm Mawar throughout Guam. The Governor's Authorized Representative, in consultation with Guam Homeland Security, the Office of Civil Defense, and the Bureau of Budget and Management Research, is authorized to determine the eligibility of overtime expenditures resulting from work performed by the government agencies, and approval shall be obtained prior to incurring any overtime or expenses. Failure to obtain prior approval may be grounds for denying reimbursement.

NOW, THEREFORE, I, LOURDES A. LEON GUERRERO, I Maga'hågan Guåhan, Governor of Guam, and by virtue of the authority vested in me by the Organic Act of Guam, as amended, and the laws of Guam, do order as follows:

1. **State of Emergency continues.** The state of emergency declared in Executive Order No. 2023-02 in response to the approach of Tropical Storm Mawar (now Typhoon Mawar) remains in effect.
2. **Emergency Procurement and Emergency Expenses.** In addition to the categories of procurements authorized in E.O. No. 2023-02, pursuant to Section 5215 of Title 5, Guam Code Annotated, authorizing emergency procurement upon executive order, and Section 22402 of Title 5, Guam Code Annotated, I hereby authorize emergency procurement for emergency response expenses in response to Typhoon Mawar, including but not limited to procurements related to safety and security; food, water, and sheltering; health and medical; energy; communications; transportation; and hazardous materials, in excess of initial expenditure amounts identified in E.O. No. 2023-02. Procurements in furtherance of emergency efforts of the Guam Power Authority and Guam Waterworks Authority to restore utilities to our community, and procurements in furtherance of typhoon debris removal, are expressly authorized herein. All other provisions of Executive Order No. 2023-02 remain in place.
 - (a) Emergency procurement of goods and services relative to this Executive Order shall comply with the further requirements provided in 5 GCA Section 5215.

ISLAND OF GUAM
OFFICE OF THE GOVERNOR
HAGATNA, GUAM 96932
U.S.A.

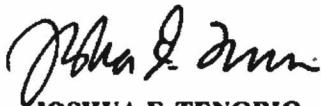

(b) As provided in Section 5215, the effective period for emergency procurements made pursuant to this order shall be for a ninety (90) day period immediately following the date of the Determination of Need for Emergency Procurement. Procurements made under the prior authorization provided in E.O. No. 2023-02, authorized therein for an effective period of thirty (30) days, may be extended for an additional period of sixty (60) days following the date of the Determination of Need for Emergency Procurement. Any further extensions shall comply with the requirements of Section 5215(e).

3. **Authorization for Overtime.** The authorization in E.O. No. 2023-02 for payment of overtime, for exempt and non-exempt Government of Guam employees, to work in excess of forty (40) hours a week in order to mitigate and respond to the effects of Typhoon Mawar throughout Guam remains in effect, for amounts in excess of initial expenditure amounts identified in E.O. No. 2023-02.
4. **Documentation of Expenses.** All departments and agencies are reminded to keep appropriate documentation on all emergency expenses incurred pursuant to this Executive Order for inspection by the Executive and Legislative Branches and by the Public Auditor of Guam, and in anticipation of federal disaster assistance approval by the President of the United States to be administered by the Federal Emergency Management Agency.

SIGNED AND PROMULGATED at Hagatna, Guam, this 6th day of June, 2023.

SCOPE OF WORK

Guam EPA 3

Solid Waste Management Facility to provide Labor, Equipment, Collection, Removal, and Disposal of Green Waste and Clean Wood Waste generated by Typhoon Mawar for the following scope of work:

- 1. Provide heavy equipment, i.e. backhoes, excavators and dump trucks, for the collection and hauling of green waste from government identified areas to permitted processing facilities;**
- 1a. Utilize and operate Collection and hauling services for green waste and clean wood waste consolidated by DPW and the 19 Village Mayors;**
- 2. Provide tub grinders, wood chippers, horizontal shredders, and wood mulching equipment for the processing of green waste and clean wood waste;**
- 2a. Utilize and operate stationary tub grinding, wood chipping, mulching, and shredding operations for green waste and clean wood waste transported to the processing facility;**
- 2b. Utilize and operate Mobile tub grinding, wood chipping, mulching, and shredding services for green waste and clean wood waste to deployed locations on an as-needed basis;**
- 3. Provide Mobile Air Curtain Burners to incinerate green waste identified by the Bio-Security section of the Dept. of Agriculture impacted with invasive species;**
- 3a. Utilize and operate mobile air curtain burning services for green waste and clean wood waste impacted with invasive species as identified by the Bio-Security section of the Dept. of Agriculture;**
- 4. Determine and finalize the disposition of the Mobile processed green waste and clean wood waste generated when deployed;**
- 5. Determine and finalize the disposition of Mobile Air Curtain Burner Ash generated when deployed;**
- 6. Prepare and submit a weekly Mobile and Stationary Waste Report that includes the following:**
 - 6a. Date & Time Waste Received;**
 - 6b. Village;**
 - 6c. Waste Type and volume;**
 - 6d. Processing type (Compost or Air Curtain Incinerated);**
 - 6e. Mobile processed green waste and clean wood waste;**

MEMORANDUM

FROM: Christopher Rosario, State Entomologist,
Department of Agriculture, Biosecurity Division

SUBJECT: Green Waste Management

Hafa Adai,

After the full onslaught of Super Typhoon Mawar that hit Guam May 24, 2023, recovery efforts involve cleaning debris of both structural damage and green waste. Green waste is also known as biological waste made from any type of plant material such as cut trees, grasses, bushes, and shrubs. Green waste buildup is inevitable following the aftermath of super typhoon Mawar. However, a green waste management strategy is needed in place to prevent the spread of invasive species such as little fire ant (LFA), *Wasmania auropunctata* and coconut rhinoceros beetle (CRB), *Oryctes rhinoceros* into other properties on Guam.

In regards to green waste management, here is my suggested protocol for mitigation of invasive species which include LFA and CRB. I have also attached a flow chart below.

1. Transfer of green waste piles from residential homes to municipal green waste staging sites

Sanitation is a key when transferring green waste from one site to another. Sanitation will involve power washing wheels and exterior surface of transfer vehicles every time green waste is dropped off. Waste loads should also be covered while being transferred from site to site to ensure no plant material flies out during transport.

2. Active composting instead of passive composting

After green waste is processed into mulch, active composting is required. The difference between active composting and passive composting is that active composting requires a lot more work and monitoring. Active composting requires the mulch piles to be rotated so that the temperature can raise to at least 140° F to kill any pests, weeds, or diseases that linger on dead plant material. A rule of thumb for active composting is that decomposing materials should be turned over every 4 days.

Cheers,
Christopher Rosario
State Entomologist

Agriculture as a result of invasive species and the threat they pose to public health and environmental destruction
Agriculture requires the following:

1. No green waste debris is allowed to leave any of the sites designated in each of the villages to any private individual, govt agency or commercial establishment until it has gone through the compost/mulching/ shredding process.

Once it has been deposited into these approved FEMA holding sites, only the awarded contractor is allowed to transport untreated green waste debris directly to the processing centers for treatment.

2. Compost and Mulching conducted by the awarded bio mass company(s) must meet CCOM and CCP standards or at least processes and holds Compost/Mulch for a minimum of at least 135° not to exceed 160° to properly destroy and kill Rhino Beetles and Little Fire Ants and other pests in the piles and mounds. Piles and mounds should not exceed a height that makes it difficult to properly mix and turn the Compost/Mulch for proper breakdown and standards identifying as Compost/Mulch.

3. No compost/Mulch can be allowed to leave the processing facility to private individuals, government, and commercial establishment without being mixed/turned for at least 3 hours prior to ensure that the heat generated in the interior to circulate to outward areas of the pile/mounds that could contain invasives listed above.

4. The Department of Agriculture and the Mayors Council shall be reserved up to 30% of the total amount of composted/mulched green waste material.

5. Tekken (Chamoru) fishing nets shall be used to cover piles/mounds sitting for long periods of time, with dimensions of 1" knot to knot made of .25mm nylon filament. These piles/mounds must also too meet the specs of 3 hour wait time with mix/turn to allow heat to kill any invasives.

BIOSECURITY COMPLIANCE AGREEMENT FOR THE MITIGATION OF TYPHOON GENERATED GREEN WASTE

Typhoon generated green waste has a great potential for inadvertent and unnecessary dissemination or proliferation of many invasive species on Guam. The Little Fire Ant (LFA) and Coconut Rhinoceros Beetle (CRB), in particular, currently present such threats if proper procedures are not followed in the movement, storage and processing of green waste that is accumulated after a typhoon.

Any individual, corporation, company, association, firm, partnership, society, or joint stock company, hereafter known as the Establishment, engaged in the business of handling, processing or disposing of green waste in accordance with the requirements of the Government of Guam's laws and regulations for invasive species prevention and management (Guam Code Annotated, Chapter 61, Articles 1 and 2, and Public Law 31-43) must first enter into a Compliance Agreement with the Guam Department of Agriculture, Biosecurity Division, hereafter known as the Biosecurity Division. A Compliance Agreement authorizing the handling of regulated green waste is a legally binding contract between the Government of Guam and an establishment which has been approved by the Government of Guam to handle regulated green waste in such a way as to minimize the possibility of invasive species proliferation or spread.

The Establishment, (*insert name of establishment*), by entering into this Compliance Agreement (which may include Addenda), agrees to operate in accordance with the Biosecurity Division's regulations and policies when handling or processing regulated green waste. All other Government of Guam regulations must also be adhered to, including but not limited to, regulations of the Guam Environmental Protection Agency concerning pesticide usage, pollution control or composting.

All employees or agents of (*insert name of establishment*) must comply with the regulations and handling requirements pertaining to regulated green waste and all conditions and Addenda included in this Compliance Agreement, as deemed by the Director of Agriculture to be necessary to prevent the dissemination or proliferation within Guam of plant pests and/or other invasive or dangerous species of organisms that may be harboured in the green waste.

The Establishment, (*insert name of establishment*), by entering into this Compliance Agreement, agrees to cooperate fully with personnel of Biosecurity Division and to allow such personnel to inspect any and all green waste operations, facilities, or required records generated or used for green waste processing or disposal. Such inspections may occur at any time and not be announced in advance.

Specific requirements and protocols for different types of green waste processing or disposal operations are provided below:

GREEN WASTE TO BE PROCESSED BY INCINERATION

1. No green waste may be moved from a staging site without express permission granted by Biosecurity Division.
2. A fifty foot perimeter around each green waste site must be treated with a granular insecticide (Siesta® or Amdro®) every six (6) weeks until the green waste is completely incinerated. Any land area upon which the piles had been situated must also be treated.
3. Green waste piles awaiting incineration must be covered with prescribed monofilament netting (tekken), purchased by the Establishment, to mitigate entry and exit of CRB.
4. Incineration of green waste must proceed as expeditiously as possible.
5. Additional treatments of the piles themselves with a spray-on liquid insecticide mixture may be ordered if it is determined necessary by Biosecurity Division
6. All insecticide treatments must be conducted by appropriately certified applicators for the insecticide being used and all appropriate safety measure as indicated on the insecticide labels must be followed by employees of the Establishment. All Guam Environmental Protection Agency requirements must be met.
7. Insecticides used and methods of application will be as determined by the Biosecurity Division and based upon research and protocols developed by the Hawaii Ant Lab, the University of Guam, or the Guam Department of Agriculture.
8. Costs for insecticides and their application will be borne entirely by the Establishment.

GREEN WASTE TO BE CHIPPED AND COMPOSTED

- 1. No green waste may be moved from a staging site without express permission granted by the Biosecurity Division. It is assumed that the green waste will be chipped on site and then moved to another location for composting.**
- 2. A fifty foot perimeter around each green waste site must be treated with a granular insecticide (Siesta® or Amdro®) every six (6) weeks until the green waste is completely chipped and moved. Any land area upon which the piles had been situated must also be treated when the chipped material is moved off.**
- 3. Any trucks loaded with chipped material must be sprayed with an approved liquid insecticide labelled for ants and covered with a tarp prior to transport; this is to prevent any dispersal of ants during transport.**
- 4. Piles of chipped material that have been moved and are being composted must have a fifty foot perimeter treated with a granular insecticide (Siesta or Amdro) every six (6) weeks until the composting process is complete.**
- 5. Composting must be performed in an industry approved manner including regular turning of the piles and temperature monitoring of the interior of the piles with long temperature probes and with appropriate record keeping. If satisfactorily high temperatures are reached during the composting process, this will help to mitigate invasive species within the piles and allow the piles themselves to go untreated with insecticide.**
- 6. Composting must proceed as expeditiously as possible. A final survey for LFA in and around the compost piles will be conducted by Department of Agriculture employees prior to release of composted product from quarantine.**
- 7. Additional treatments of the piles themselves with a spray-on liquid insecticide mixture may be ordered if it is determined necessary by BiosecDiv**
- 8. All insecticide treatments must be conducted by appropriately certified applicators for the insecticide being used and all appropriate safety measure as indicated on the insecticide labels must be followed by employees of the Establishment. All Guam Environmental Protection Agency requirements must be met.**
- 9. Insecticides used and methods of application will be as determined by the Biosecurity Division and based upon research and protocols developed by the Hawaii Ant Lab, the University of Guam, or the Guam Department of Agriculture.**

10. Costs for insecticides and their application will be borne entirely by the Establishment.

**DETERMINATION OF NEED
FOR EMERGENCY PROCUREMENT**

DATE: JUNE 9, 2023

AGENCY: GUAM HOMELAND SECURITY/OFFICE OF CIVIL DEFENSE

**RE: TYPHOON MAWAR – VEGETATIVE GREEN WASTE DISPOSAL
AND AIR CURTAIN BURNER**

WHEREAS, on May 20, 2023, the Governor of Guam issued Executive Order No. 2023-02 declaring a State of Emergency in anticipation of the approach of Tropical Storm Mawar; and

WHEREAS, over the next several days, Tropical Storm Mawar intensified and became a Category 4 Typhoon before passing over Guam on May 24, 2023; and

WHEREAS, the passage of Typhoon Mawar created an extensive storm debris field all over the entire island of Guam, much of which consists of organic vegetative matter such as leaves, fallen trees, limbs, stumps, branches, and yard waste (aka "green waste"); and

WHEREAS, the enormous piles and scattered areas of decaying vegetative green waste threaten the health, safety, and welfare of the public by preventing the safe passage of residents from their homes and by creating a noxious environmental hazard that serves as a breeding ground for invasive species and vermin; and

WHEREAS, it is critical that the immediate removal, disposal, and incineration of the green waste be prioritized in order to eliminate the imminent threat posed to public health, safety, and welfare; and to ensure the orderly restoration of the community; and

WHEREAS, on May 31, 2023, Public Law 37-17 was enacted which authorizes the use of up to Fifty Million Dollars (\$50,000,000.00) from the General Fund for Typhoon Mawar emergency response expenses with the anticipation that the expenses shall be reimbursable by the federal government; and

WHEREAS, the Governor's Executive Order No. 2023-02 authorizes emergency procurement up to a combined total maximum of Two Hundred Fifty Thousand Dollars (\$250,000.00); and

WHEREAS, the Governor's Executive Order No. 2023-05 expands Executive Order No. 2023-02 and expressly authorizes the emergency procurement of emergency response expenses in excess of the initial \$250,000.00 for expenses including and not limited to, among other things, procurements related to the restoration of utilities by Guam Power Authority and Guam Waterworks Authority and procurements in furtherance of typhoon debris removal; and

WHEREAS, as required by Title 5 GCA Section 5150, the Guam Homeland Security/Office of Civil Defense and the General Services Agency (GSA) have consulted with the Office of the Attorney General of Guam with respect to the form and legality of any emergency procurements estimated to result in an award of \$500,000.00 or more.

DETERMINATION

1. Based on the foregoing, the undersigned does hereby DETERMINE that as a direct consequence of the aftermath and conditions resulting from Typhoon Mawar, there exists in Guam an imminent threat to public health, safety and welfare and to the health and safety of the environment, which could not have been foreseen through the use of reasonable and prudent management or procurement procedures, and which cannot be addressed by other procurement methods of source selection.

2. The threat is imminent, present, and continuing. Emergency procurement as authorized by Title 5 GCA Section 5215 and Executive Order Nos. 2023-02 and 2023-95 is necessary without delay to procure equipment and services relative to the immediate removal, disposal, and incineration of the decaying vegetative green waste and debris left behind by Typhoon Mawar, including but not limited to an air burner curtain; and to thereby ensure the safeguard and protection of public health, welfare, and safety, and to the health and safety of the environment.

3. The undersigned affirms solemnly that the described Typhoon Mawar emergency conditions and the related emergency procurement of equipment and services relative to the immediate removal, disposal, and incineration of the vegetative green waste, including an air burner curtain and any necessary related supplies, services or emergency construction works, is not being used and will not be used, directly or indirectly, to avoid other methods of source selection or the purposes and policies of the Guam Procurement Law.

4. This Determination of Need is based on the assessments, reports, research, price quotations, and advice given to GSA by Guam Homeland Security/Office of Civil Defense and the agencies and officials of the Government of Guam; and

5. Copies of the Governor's Executive Order Nos. 2023-02 and 2023-05 are attached to this Determination of Need and shall be made a part of any purchase order, contract, or Notice of Award that may be made or given thereunder, and further shall be a material part of the procurement record.

Pursuant to 6 GCA Section 4308, I declare under penalty of perjury that the foregoing is true and correct.

Executed on the 9th day of June, 2023.

DAFNE MANSAPIT-SHIMIZU
Acting Chief Procurement Officer
for Guam General Services Agency

COUNTERSIGNED AS CONCURRING:

CHARLES ESTEVES
Administrator
Guam Homeland Security/Office of Civil Defense

**ISLAND OF GUAM
OFFICE OF THE GOVERNOR
HAGATNA, GUAM 96932
U.S.A.**

EXECUTIVE ORDER NO. 2023-02

**RELATIVE TO DECLARING A STATE OF EMERGENCY IN
ANTICIPATION OF THE APPROACH OF TROPICAL STORM
MAWAR**

WHEREAS, on May 21, 2023, the National Weather Service, Guam Weather Forecast Office ("NWS"), forecast that Tropical Storm Mawar (formerly Tropical Depression 02W), which is located approximately 570 miles south-southeast of Guam, is steadily intensifying and maintaining a track toward Guam and the Mariana Islands; and

WHEREAS, while a Typhoon Watch remains in effect for Guam, projecting the possibility of damaging winds of 39 mph or more within 48 hours, NWS states that there is a high likelihood for Tropical Storm to Typhoon impacts, with possible winds up to 74 mph, and heavy rainfall of at least 5-9 inches throughout the Marianas. Tropical Storm Mawar is expected to further intensify into a typhoon by the time it arrives in our region. Tropical-Storm-Force winds are presently anticipated from early Tuesday, May 23, 2023 through late Wednesday, May 24, 2023, and dangerous surf is possible as early as Monday, May 22, 2023; and

WHEREAS, on Saturday, May 20, 2023 at 1:00 p.m., I placed the island in Condition of Readiness 3, in anticipation of damaging winds and rains within forty-eight (48) hours. At 8:00 p.m. on May, 21, 2023, I placed the island in Condition of Readiness 2; and

WHEREAS, based upon current forecasts and modeling, the strength and track of Tropical Storm Mawar represent an imminent, credible, and significant threat to the health, safety and welfare of Guam; and

WHEREAS, in anticipation of Mawar's closest approach, the Offices of Homeland Security and Civil Defense ("GHS/OCD") and other territorial agencies are instructed to take precautionary and proactive steps in order to secure the safety of the island and to reduce the potential destruction of property and loss of life; and

WHEREAS, an emergency situation exists such that in order to safeguard the community, critical infrastructure, and the general welfare of the island against the impending dangerous onset of destructive winds and rains forecast to strike Guam, it is critical that timely precautions be taken and resources be immediately identified, mobilized and deployed as contemplated in the GHS/OCD-FEMA 2018 Guam Catastrophic Typhoon Plan and in the 2016 Guam Comprehensive Emergency Management Plan.

//

//

4. Authorization for Overtime. I further authorize the payment of overtime, for exempt and non-exempt Government of Guam employees, to work in excess of forty (40) hours a week in order to mitigate and respond to the effects of Tropical Storm Mawar throughout Guam. The Governor's Authorized Representative, in consultation with Guam Homeland Security, the Office of Civil Defense, and the Bureau of Budget and Management Research, is authorized to determine the eligibility of overtime expenditures resulting from work performed by the government agencies, and approval shall be obtained prior to incurring any overtime or expenses. Failure to obtain prior approval may be grounds for denying reimbursement.
3. GHS/OCD to be Lead Agency; Purpose of Emergency Procurement. GHS/OCD shall be the lead agency for the emergency procurement of any goods and services relative to this Executive Order, the effective period of which shall be for thirty (30) days as provided in § 5215 of Title 5, Guam Code Annotated.
2. Emergency Procurement and Emergency Expenses. Pursuant to Section 5215 of Title 5, Guam Code Annotated, authorizing emergency procurement upon executive order, and § 22402 of Title 5, Guam Code Annotated, I hereby authorize overtime and emergency procurement for heavy equipment rental, debris removal, nursing and medical support services for the North and Southern Community Health Centers, Guam Department of Education typhoon shelter operations, lodging for displaced residents, and the purchase of supplies, materials, goods, services or other expenditures, up to a combined total maximum of Two Hundred Fifty Thousand Dollars (\$250,000.00).
1. Declaration of State of Emergency. A state of emergency is hereby declared for the island of Guam in anticipation of the approach of Tropical Storm Mawar.
- NOW, THEREFORE, I, LOURDES A. LEON GUERRERO, I Maga'hagan Gubhan, Governor of Guam, and by virtue of the authority vested in me by the Organic Act of Guam, as amended, and the laws of Guam, do order as follows:

ISLAND OF GUAM
OFFICE OF THE GOVERNOR
MAGATNA, GUAM 96932

ISLAND OF GUAM
OFFICE OF THE GOVERNOR
HAGATNA, GUAM 96932
U.S.A.

5. **Documentation of Expenses.** All departments and agencies are instructed to keep appropriate documentation on all emergency expenses incurred pursuant to this Executive Order for inspection by the Executive and Legislative Branches and by the Public Auditor of Guam, and in anticipation of federal disaster assistance approval by the President of the United States to be administered by the Federal Emergency Management Agency.

SIGNED AND PROMULGATED at Hagåtña, Guam, this 21st day of May, 2023.

LOURDES A. LEON GUERRERO
Maga'hågan Guåhan
Governor of Guam

EXECUTIVE ORDER NO. 2023-05

RELATIVE TO EMERGENCY PROCUREMENT
AUTHORIZATION DURING THE STATE OF EMERGENCY IN
RESPONSE TO TYPHOON MAWAR

WHEREAS, on May 21, 2023, I issued Executive Order No. 2023-02 in anticipation of the approach of Tropical Storm Mawar and on May 22, 2023, at my request, President Joseph R. Biden issued Emergency Declaration FEMA-3594-EM; and

WHEREAS, on May 22, 2023, Tropical Storm Mawar was upgraded to a typhoon. On May 23, 2023, Typhoon Mawar was upgraded to a Category 4 typhoon, and in response to this intensification, I issued Executive Order No. 2023-03, ordering the evacuation of residents in low lying, coastal and flood prone areas; and

WHEREAS, on May 24, 2023, Typhoon Mawar made landfall on Guam, with sustained winds of 140 mph and gusts up to 170 mph. Typhoon Mawar maintained its intensity as it passed through the Rota Channel between Guam and Rota, with destructive typhoon force winds continuing through May 25, 2023. On May 25, 2023, at my request, President Biden issued Major Disaster Declaration FEMA-4715-DR; and

WHEREAS, Typhoon Mawar represents the closest impact of any typhoon of this magnitude on our island in over twenty (20) years, and caused substantial damage to our island; and

WHEREAS, aggressive recovery efforts are currently under way. The Guam Power Authority ("GPA") has worked tirelessly to restore power to our island, which in turn will support other critical recovery efforts. Presently, nearly all our substations have been restored, as well as a majority of our feeder stations. Power has been restored to communities surrounding substations and high priority services such as hospitals and clinics, and these efforts will enable GPA to restore power to our neighborhoods more broadly; and

WHEREAS, the loss of consistent access to island power has unfortunately slowed recovery of our water and wastewater systems, causing water pumping stations to shut down, and the island-wide water distribution system to fail. This resulted in an island-wide loss of water service, which is in the process of being restored; and

WHEREAS, on June 3, 2023, I issued Executive Order No. 2023-04, declaring a state of emergency due to the public water supply shortage as a result of Typhoon Mawar, to activate 9 GCA § 55.60, preventing the excessive use of water for purposes such as water-blasting and car-washing, to allow reservoir levels to build and provide service to members of our community who do not currently have water; and

WHEREAS, Typhoon Mawar also resulted in substantial storm debris, including extensive green waste, which consists of organic vegetative matter such as leaves, fallen trees, limbs, stumps, branches, and yard waste; and

ISLAND OF GUAM
OFFICE OF THE GOVERNOR
HAGATNA, GUAM 96932
U.S.A.

WHEREAS, the accumulation of green waste creates a breeding ground for invasive species and vermin, posing a significant environmental hazard; and

WHEREAS, decaying vegetative waste also threatens the health, safety, and welfare of our community by preventing the safe passage of residents from their homes, as well as the passage of utility vehicles attempting to restore water and power services to our villages; and

WHEREAS, on May 31, 2023, I signed Bill No. 127-37 into Public Law 37-17, which authorizes the use of up to Fifty Million Dollars (\$50,000,000) from the General Fund for emergency response expenses; and

WHEREAS, while the state of emergency declared in E.O. No. 2023-02 remains in effect, and emergency procurements authorized therein continue to be authorized, and while emergency procurements not expressly provided in E.O. No. 2023-02 may be processed pursuant to 5 GCA § 5215, in the interest of expediting broader categories of emergency procurements, it is prudent to authorize emergency procurement and emergency expense categories to respond to the state of emergency declared in E.O. No. 2023-02 that align with the categories identified by the Legislature in P.L. No. 37-17.

NOW, THEREFORE, I, LOURDES A. LEON GUERRERO, I Maga'hågan Guåhan, Governor of Guam, and by virtue of the authority vested in me by the Organic Act of Guam, as amended, and the laws of Guam, do order as follows:

1. **State of Emergency continues.** The state of emergency declared in Executive Order No. 2023-02 in response to the approach of Tropical Storm Mawar (now Typhoon Mawar) remains in effect.
2. **Emergency Procurement and Emergency Expenses.** In addition to the categories of procurements authorized in E.O. No. 2023-02, pursuant to Section 5215 of Title 5, Guam Code Annotated, authorizing emergency procurement upon executive order, and Section 22402 of Title 5, Guam Code Annotated, I hereby authorize emergency procurement for emergency response expenses in response to Typhoon Mawar, including but not limited to procurements related to safety and security; food, water, and sheltering; health and medical; energy; communications; transportation; and hazardous materials, in excess of initial expenditure amounts identified in E.O. No. 2023-02. Procurements in furtherance of emergency efforts of the Guam Power Authority and Guam Waterworks Authority to restore utilities to our community, and procurements in furtherance of typhoon debris removal, are expressly authorized herein. All other provisions of Executive Order No. 2023-02 remain in place.
 - (a) Emergency procurement of goods and services relative to this Executive Order shall comply with the further requirements provided in 5 GCA Section 5215.

ISLAND OF GUAM
OFFICE OF THE GOVERNOR
HAGATNA, GUAM 96932
U.S.A.

(b) As provided in Section 5215, the effective period for emergency procurements made pursuant to this order shall be for a ninety (90) day period immediately following the date of the Determination of Need for Emergency Procurement. Procurements made under the prior authorization provided in E.O. No. 2023-02, authorized therein for an effective period of thirty (30) days, may be extended for an additional period of sixty (60) days following the date of the Determination of Need for Emergency Procurement. Any further extensions shall comply with the requirements of Section 5215(e).

3. **Authorization for Overtime.** The authorization in E.O. No. 2023-02 for payment of overtime, for exempt and non-exempt Government of Guam employees, to work in excess of forty (40) hours a week in order to mitigate and respond to the effects of Typhoon Mawar throughout Guam remains in effect, for amounts in excess of initial expenditure amounts identified in E.O. No. 2023-02.

4. **Documentation of Expenses.** All departments and agencies are reminded to keep appropriate documentation on all emergency expenses incurred pursuant to this Executive Order for inspection by the Executive and Legislative Branches and by the Public Auditor of Guam, and in anticipation of federal disaster assistance approval by the President of the United States to be administered by the Federal Emergency Management Agency.

SIGNED AND PROMULGATED at Hagatna, Guam, this 6th day of June, 2023.

SCOPE OF WORK

Guam EPA 3

Solid Waste Management Facility to provide Labor, Equipment, Collection, Removal, and Disposal of Green Waste and Clean Wood Waste generated by Typhoon Mawar for the following scope of work:

- 1. Provide heavy equipment, i.e. backhoes, excavators and dump trucks, for the collection and hauling of green waste from government identified areas to permitted processing facilities;**
- 1a. Utilize and operate Collection and hauling services for green waste and clean wood waste consolidated by DPW and the 19 Village Mayors;**
- 2. Provide tub grinders, wood chippers, horizontal shredders, and wood mulching equipment for the processing of green waste and clean wood waste;**
- 2a. Utilize and operate stationary tub grinding, wood chipping, mulching, and shredding operations for green waste and clean wood waste transported to the processing facility;**
- 2b. Utilize and operate Mobile tub grinding, wood chipping, mulching, and shredding services for green waste and clean wood waste to deployed locations on an as-needed basis;**
- 3. Provide Mobile Air Curtain Burners to incinerate green waste identified by the Bio-Security section of the Dept. of Agriculture impacted with invasive species;**
- 3a. Utilize and operate mobile air curtain burning services for green waste and clean wood waste impacted with invasive species as identified by the Bio-Security section of the Dept. of Agriculture;**
- 4. Determine and finalize the disposition of the Mobile processed green waste and clean wood waste generated when deployed;**
- 5. Determine and finalize the disposition of Mobile Air Curtain Burner Ash generated when deployed;**
- 6. Prepare and submit a weekly Mobile and Stationary Waste Report that includes the following:**
 - 6a. Date & Time Waste Received;**
 - 6b. Village;**
 - 6c. Waste Type and volume;**
 - 6d. Processing type (Compost or Air Curtain Incinerated);**
 - 6e. Mobile processed green waste and clean wood waste;**

MEMORANDUM

FROM: Christopher Rosario, State Entomologist,
Department of Agriculture, Biosecurity Division

SUBJECT: Green Waste Management

Hafa Adai,

After the full onslaught of Supertyphoon Mawar that hit Guam May 24, 2023, recovery efforts involve cleaning debris of both structural damage and green waste. Green waste is also known as biological waste made from any type of plant material such as cut trees, grasses, bushes, and shrubs. Green waste buildup is inevitable following the aftermath of super typhoon Mawar. However, a green waste management strategy is needed in place to prevent the spread of invasive species such as little fire ant (LFA), *Wasmania auropunctata* and coconut rhinoceros beetle (CRB), *Orcytes rhinoceros* into other properties on Guam.

In regards to green waste management, here is my suggested protocol for mitigation of invasive species which include LFA and CRB. I have also attached a flow chart below.

1. Transfer of green waste piles from residential homes to municipal green waste staging sites

Sanitation is a key when transferring green waste from one site to another. Sanitation will involve power washing wheels and exterior surface of transfer vehicles every time green waste is dropped off. Waste loads should also be covered while being transferred from site to site to ensure no plant material flies out during transport.

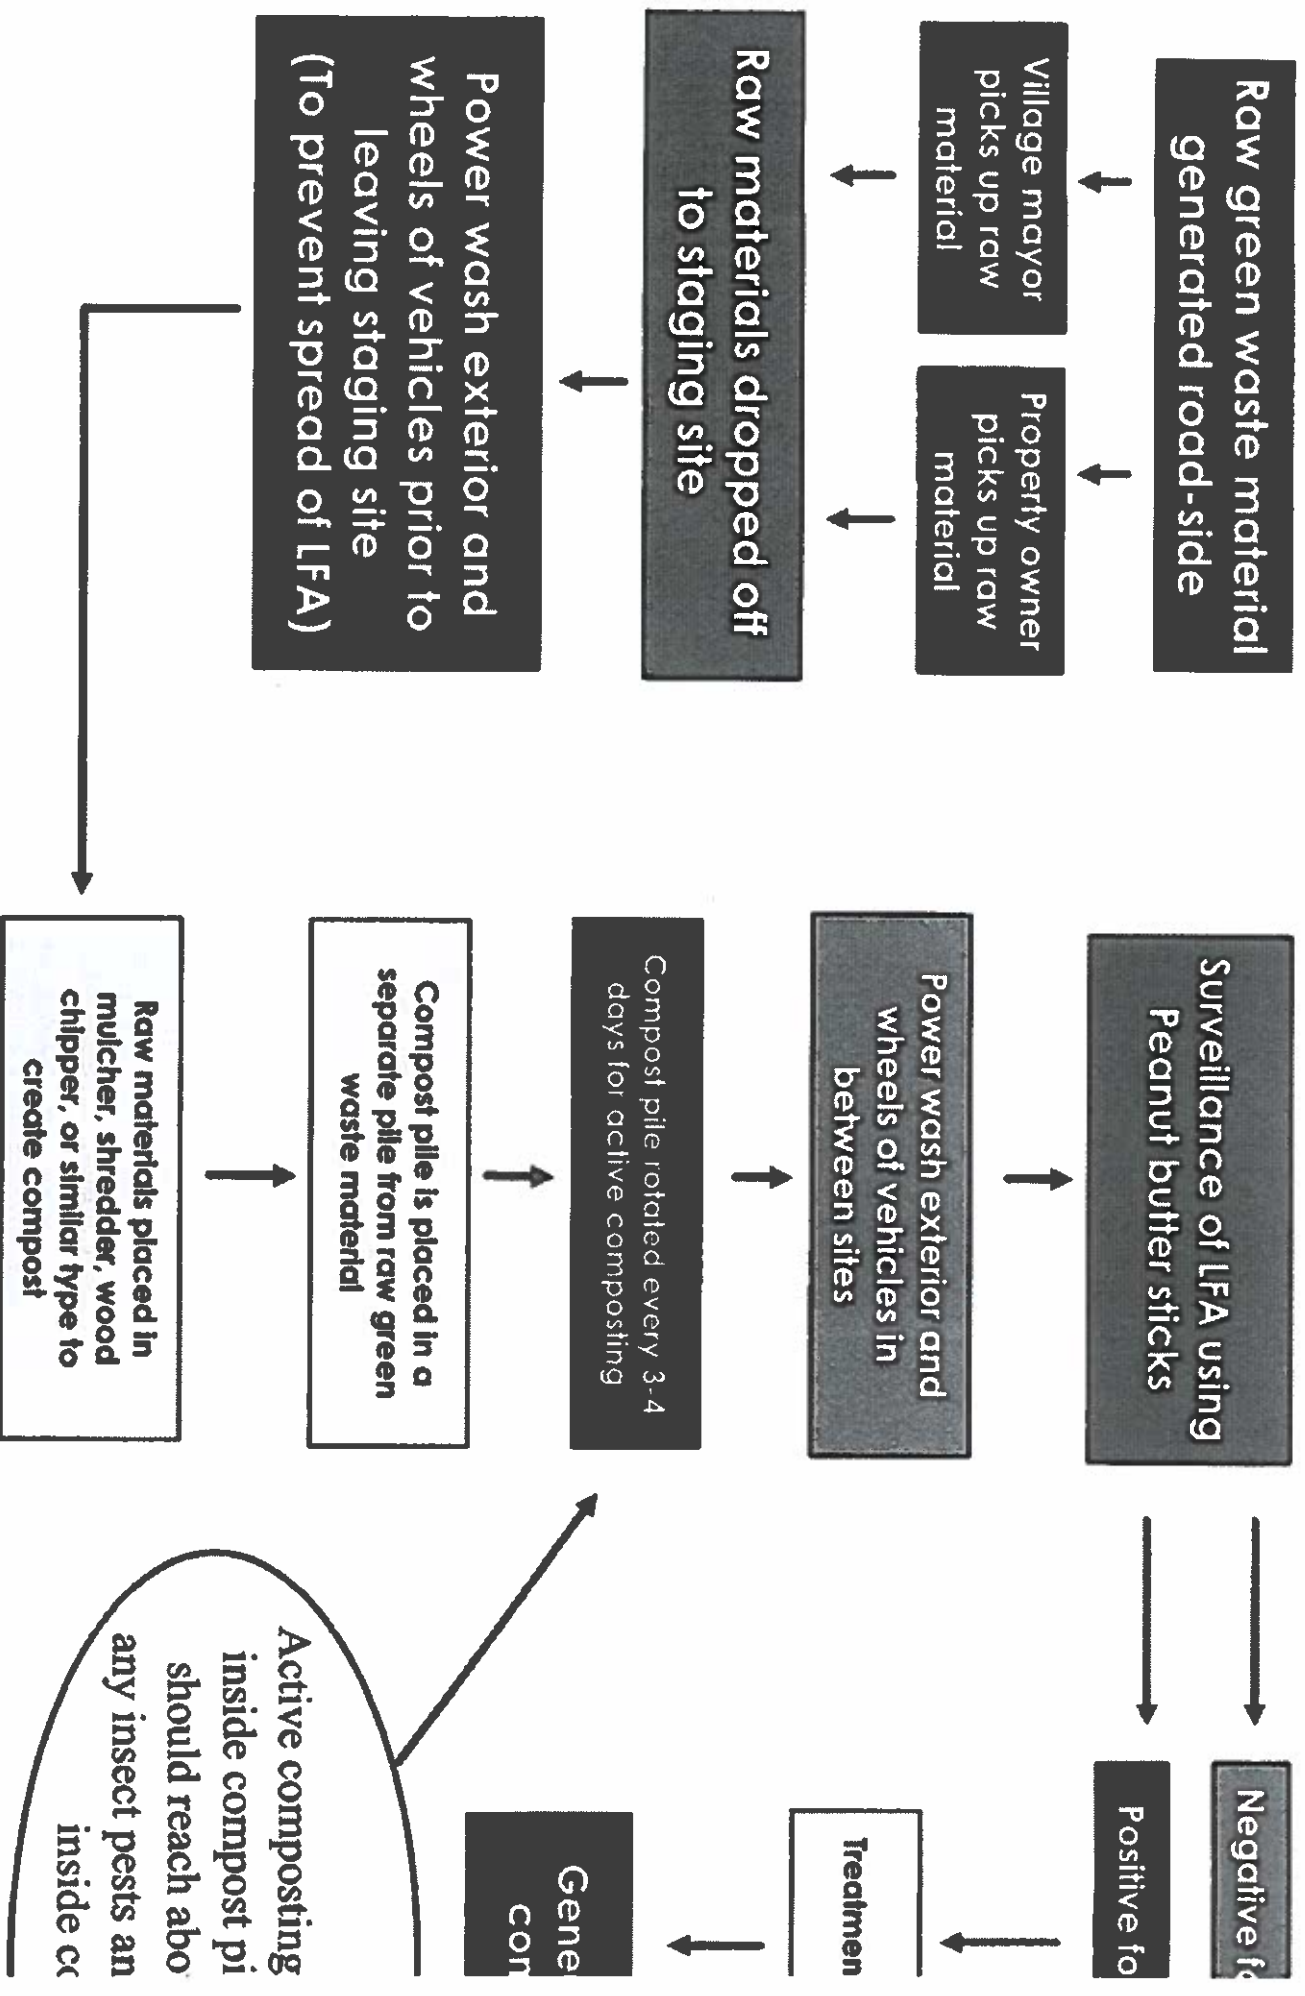

2. Active composting instead of passive composting

After green waste is processed into mulch, active composting is required. The difference between active composting and passive composting is that active composting requires a lot more work and monitoring. Active composting requires the mulch piles to be rotated so that the temperature can raise to at least 140° F to kill any pests, weeds, or diseases that linger on dead plant material. A rule of thumb for active composting is that decomposing materials should be turned over every 4 days.

Cheers,
Christopher Rosario
State Entomologist

Agriculture as a result of invasive species and the threat they pose to public health and environmental destruction Agriculture requires the following:

1. No green waste debris is allowed to leave any of the sites designated in each of the villages to any private individual, govt agency or commercial establishment until it has gone through the compost/mulching/ shredding process.

Once it has been deposited into these approved FEMA holding sites, only the awarded contractor is allowed to transport untreated green waste debris directly to the processing centers for treatment.

2. Compost and Mulching conducted by the awarded bio mass company(s) must meet CCOM and CCP standards or at least processes and holds Compost/Mulch for a minimum of at least 135° not to exceed 160° to properly destroy and kill Rhino Beetles and Little Fire Ants and other pests in the piles and mounds. Piles and mounds should not exceed a height that makes it difficult to properly mix and turn the Compost/Mulch for proper breakdown and standards identifying as Compost/Mulch.

3. No compost/Mulch can be allowed to leave the processing facility to private individuals, government, and commercial establishment without being mixed/turned for at least 3 hours prior to ensure that the heat generated in the interior to circulate to outward areas of the pile/mounds that could contain invasives listed above.

4. The Department of Agriculture and the Mayors Council shall be reserved up to 30% of the total amount of composted/mulched green waste material.

5. Tekken (Chamoru) fishing nets shall be used to cover piles/mounds sitting for long periods of time, with dimensions of 1" knot to knot made of .25mm nylon filament. These piles/mounds must also too meet the specs of 3 hour wait time with mix/turn to allow heat to kill any invasives.

BIOSECURITY COMPLIANCE AGREEMENT FOR THE MITIGATION OF TYPHOON GENERATED GREEN WASTE

Typhoon generated green waste has a great potential for inadvertent and unnecessary dissemination or proliferation of many invasive species on Guam. The Little Fire Ant (LFA) and Coconut Rhinoceros Beetle (CRB), in particular, currently present such threats if proper procedures are not followed in the movement, storage and processing of green waste that is accumulated after a typhoon.

Any individual, corporation, company, association, firm, partnership, society, or joint stock company, hereafter known as the Establishment, engaged in the business of handling, processing or disposing of green waste in accordance with the requirements of the Government of Guam's laws and regulations for invasive species prevention and management (Guam Code Annotated, Chapter 61, Articles 1 and 2, and Public Law 31-43) must first enter into a Compliance Agreement with the Guam Department of Agriculture, Biosecurity Division, hereafter known as the Biosecurity Division. A Compliance Agreement authorizing the handling of regulated green waste is a legally binding contract between the Government of Guam and an establishment which has been approved by the Government of Guam to handle regulated green waste in such a way as to minimize the possibility of invasive species proliferation or spread.

The Establishment, (*insert name of establishment*), by entering into this Compliance Agreement (which may include Addenda), agrees to operate in accordance with the Biosecurity Division's regulations and policies when handling or processing regulated green waste. All other Government of Guam regulations must also be adhered to, including but not limited to, regulations of the Guam Environmental Protection Agency concerning pesticide usage, pollution control or composting.

All employees or agents of (*insert name of establishment*) must comply with the regulations and handling requirements pertaining to regulated green waste and all conditions and Addenda included in this Compliance Agreement, as deemed by the Director of Agriculture to be necessary to prevent the dissemination or proliferation within Guam of plant pests and/or other invasive or dangerous species of organisms that may be harboured in the green waste.

The Establishment, (*insert name of establishment*), by entering into this Compliance Agreement, agrees to cooperate fully with personnel of Biosecurity Division and to allow such personnel to inspect any and all green waste operations, facilities, or required records generated or used for green waste processing or disposal. Such inspections may occur at any time and not be announced in advance.

Specific requirements and protocols for different types of green waste processing or disposal operations are provided below:

GREEN WASTE TO BE PROCESSED BY INCINERATION

1. No green waste may be moved from a staging site without express permission granted by Biosecurity Division.
2. A fifty foot perimeter around each green waste site must be treated with a granular insecticide (Siestar® or Amdro®) every six (6) weeks until the green waste is completely incinerated. Any land area upon which the piles had been situated must also be treated.
3. Green waste piles awaiting incineration must be covered with prescribed monofilament netting (tecken), purchased by the Establishment, to mitigate entry and exit of CRB.
4. Incineration of green waste must proceed as expeditiously as possible.
5. Additional treatments of the piles themselves with a spray-on liquid insecticide mixture may be ordered if it is determined necessary by Biosecurity Division
6. All insecticide treatments must be conducted by appropriately certified applicators for the insecticide being used and all appropriate safety measure as indicated on the insecticide labels must be followed by employees of the Establishment. All Guam Environmental Protection Agency requirements must be met.
7. Insecticides used and methods of application will be as determined by the Biosecurity Division and based upon research and protocols developed by the Hawaii Ant Lab, the University of Guam, or the Guam Department of Agriculture.
8. Costs for insecticides and their application will be borne entirely by the Establishment.

GREEN WASTE TO BE CHIPPED AND COMPOSTED

1. No green waste may be moved from a staging site without express permission granted by the Biosecurity Division. It is assumed that the green waste will be chipped on site and then moved to another location for composting.
2. A fifty foot perimeter around each green waste site must be treated with a granular insecticide (Siesta® or Amdro®) every six (6) weeks until the green waste is completely chipped and moved. Any land area upon which the piles had been situated must also be treated when the chipped material is moved off.
3. Any trucks loaded with chipped material must be sprayed with an approved liquid insecticide labelled for ants and covered with a tarp prior to transport; this is to prevent any dispersal of ants during transport.
4. Piles of chipped material that have been moved and are being composted must have a fifty foot perimeter treated with a granular insecticide (Siesta or Amdro) every six (6) weeks until the composting process is complete.
5. Composting must be performed in an industry approved manner including regular turning of the piles and temperature monitoring of the interior of the piles with long temperature probes and with appropriate record keeping. If satisfactorily high temperatures are reached during the composting process, this will help to mitigate invasive species within the piles and allow the piles themselves to go untreated with insecticide.
6. Composting must proceed as expeditiously as possible. A final survey for LFA in and around the compost piles will be conducted by Department of Agriculture employees prior to release of composted product from quarantine.
7. Additional treatments of the piles themselves with a spray-on liquid insecticide mixture may be ordered if it is determined necessary by BiosecDiv
8. All insecticide treatments must be conducted by appropriately certified applicators for the insecticide being used and all appropriate safety measure as indicated on the insecticide labels must be followed by employees of the Establishment. All Guam Environmental Protection Agency requirements must be met.
9. Insecticides used and methods of application will be as determined by the Biosecurity Division and based upon research and protocols developed by the Hawaii Ant Lab, the University of Guam, or the Guam Department of Agriculture.

10. Costs for insecticides and their application will be borne entirely by the Establishment.

Hafa Adai Anita

See additional questions.

1. Item #2 indicates process by slow speed shredder. Please confirm that processed by high speed grinder also acceptable.

2. Is only clean greewaste going to processed by ACB and shredder and or ginder? If other material will be processed please provide material classification as there are different processes and disposal requirements for other type of materials. A bid line for different material classification per process is also requested if applicable.

3. Is there a size specification for end material from grinding and shredding as there is additional requirement #4 require compost green waste reservation for DoAG?

4. In additional requirement #3 please clarify requirement to mix/turn material for 3 hours before material can leave site? This process will do little if anything to meet intent of this section.

Compost Best Management practices require turning pile 3 times once every 7 day to meet this intent.. This will add tremendous cost in equipment as well as time to turn up to 850,000CY of material 3 x before it can be moved. I recommend this is deleted.

Sincerely
John Limtiaco

Subject: Re: EMERGENCY PROCUREMENT - REQUEST FOR QUOTE

Hafa Adai Anita,

I acknowledge receipt, please provide answers to the following questions:

1. Please clarify what constitutes a "long period of time" as referenced in Item 5 of the Additional Requirements page.
2. Please clarify Item 4 of the Additional Requirements page. Will the 30% remaining compost/mulch remain at the site for the reserved agencies and they will pick it up or will we be required to deliver it and if so where?
3. Please clarify Item 4 of the Additional Requirements page. Can the contractor sub-contract commercial haulers to transport the green waste debris to contractor's permitted site?
4. Please clarify the requirement for the Bidder preparation of reports to Guam EPA that include date and time waste receive, village, waste type etc (shred compost or air curtain burning). The waste government has already started receiving the waste prior to the start of the services. How are we too report on past collections? Is the contractor now going to have to staff personal to now receive at al of the locations listed and keep these records or will this remain the responsibility of the Government.
5. Is the government responsible to provide fire fighting capabilities at each site or is the contractor required to have fire fighting capabilities on site? If contractor is responsible what is the minimum firefighting capability required for each designated processing site? If the contractor is responsible for fire fighting will we have access to a water source in close proximity free of charge or are we required to apply for a temporary meter with GWA?
6. Is the government or the contractor responsible for the tipping fees for the final disposition at Guam EPA Permitted facilities?
7. Are we able to bid for certain areas? Example can we bid Central to Northern sites and no bid other sites?
8. How will the workload be divided? Will it be based on the contractors processing capacity?
9. ACB operations will produce smoke and ash and will impact residences in close proximity to sites. Will the government or contactor be responsible for public notice and fielding complaints?
10. Can the contractor perform operations sequentially or are we required to process multiple sites concurrently?
11. What is the period/timeline of performance to complete the work awarded?
12. What is the funding source for this solicitation and what are the payment terms? How will contractor bill for work completed; upon shredding or ACB processing or after byproduct is moved to contractors permitted site?

13. ACB operations require access control on site. During operational hours will contactor be able to restrict access to site? There are multiple items being accepted at each site. During ACB operations we need to maintain a no access perimeter per GFD requirements. Who will be responsible for securing the site during non-operational hours?

Hafa Adai Mr. Esteves,

We acknowledge the receipt of the issued Notice to Proceed for the subject Purchase Order.

I was in discussion with the deputy of public works and she is supposed to send us the quantities of the debris, green waste per site based on the survey conducted by them.

We also discussed with Mr Roland Gutierrez of EPA and he was saying that the Army Corps of engineer conducted a drone survey of each site. We request to be provided a copy of the survey to help understand the volume of each site.

Once we receive the quantities from Deputy Director of DPW & Army Corps's drone survey quantities, we would like to meet with the authorized representative on each site and agree upon the volume per site prior to starting our grinding operations. We also need to **finalize the USACE Fluff Factor for the debris** that was compacted or consolidated during the receiving of the debris. These steps that are being taken will prevent any conflicts between Gov Guam & LMS, and also provides us with the best idea on completion schedule.

We would like to request a priority list of sites that Gov Guam would like LMS to work on and the test results of the Little Fire Ants (LFA) that have been tested. This helps LMS to be proactive in starting work at each site. I was reached out by some of the farmers expressing the need of 1500 CY of the mulch after we grind it and continue to receive more calls from other farmers but have not provided quantities that they require. LMS will do everything in its power to best support the community.

Additionally, we have met with the Guam Fire Department Fire Chief Tedtaotao and Ron Castro to discuss our safety and standard operating procedures in prevention of a fire hazard. An Activity Hazard Analysis is prepared and submitted for each step of our operation to help everyone involved in the operation provide the potential hazards during operations and the controls setup in place to prevent these hazards. It is a must that every person involved with this operation be read with the AHA and acknowledge that they have ready by signing the acknowledgement. We adhere to a very stringent safety standard to ensure that everyone involved goes home safely to their families at the end of the day.

We also need to confirm the load capacity of all the bridges to ensure that our machines can be transported safely, as some of our machines weight is 99,000 lbs plus the weight of the truck. I visited all of the sites, and

found that Inarajan, Merizo ,Umatac & agat has minimal or no debris collected.

To summarize, we will need the following to help plan the start of work

1. Quantities of Collected Debris per site from Deputy Director of DPW
2. Quantities of Drone Survey per site conducted by US Army Corps
3. Onsite meeting per site with Authorized Rep to agree upon quantities
4. LFA Test results per site
5. Priority List of Sites per Gov Guam
6. Load Capacity of Bridges so we can prepare Haul Route Plan for our equipment/machines.

We are available to meet and discuss if necessary but are more than happy to start the operations as soon as we get the requested information.

Thank You,

Bob Salas

**AFFIDAVIT DISCLOSING OWNERSHIP, INFLUENCE, COMMISSIONS AND
CONFLICTS OF INTEREST**

(Required by 5 GCA § 5233 as amended by P.L. 36-13 (4/9/2021))

CITY OF Tumon)
) ss.
ISLAND OF GUAM)

Preface. As a condition of submitting a Bid/Offer/Proposal or responding to any method of source selection under Guam's Procurement Law for the purpose of entering into a contract with the government of Guam, this Affidavit requires all Bidders/Offerors/Prospective Contractors to make disclosures of ownership, influence, commissions, gratuities, kickbacks, and conflicts of interest occurring **during the 365 calendar days preceding the publication of this solicitation and until award of a contract.** This includes the duty to disclose **any changes** to the facts disclosed herein throughout the solicitation process; and if the entity submitting this Affidavit is awarded a contract, the duty to disclose **any changes** to the facts disclosed herein continues throughout the life of the contract, including any extensions or renewals.

A. I, the undersigned, being first duly sworn, depose and say that I am an authorized representative of the Bidder/Offeror/Prospective Contractor and that (please check and fill out all that apply):

☐ The Bidder/Offeror/Prospective Contractor is an individual with a business license, and all decisions are by, and all profit is for, that same individual, with principal place of business street address being: _____

☐ The Bidder/Offeror/Prospective Contractor is a business or artificial person (as defined in 1 GCA § 715 or 5 GCA §§ 5030(n) or 5233(b)), and is a sole proprietorship owned entirely (100%) by _____, with principal place of business street address being: _____

☐ The Bidder/Offeror/Prospective Contractor is a business or artificial person (as defined in 1 GCA § 715 or 5 GCA §§ 5030(n) or 5233(b)), and is owned by the following multiple individuals. Note: owners of more than 10% are statutorily required to be listed below, but other owners of smaller percentage are encouraged to be listed as well.

Name of Owner	Principal Place of Business Street Address	% of Interest
Robert P. Salas	202 Hilton Road, B01	99.99%
_____	Tumon, Guam 96913	_____
_____	_____	_____
_____	_____	_____

Affidavit Disclosing Ownership, Influence,
Commissions and Conflicts of Interest
AG Procurement Form 002 (Rev. 11/17/2021)

- [] One or more of the more-than-10% owners listed above is a business or artificial person. Any more-than-25% owners of such a business or artificial person are listed below per 5 GCA § 5233. Note: any less-than-25% owners of such a business or artificial person is encouraged to also be listed below.

Name of >10% Owner Business or Artificial Person:

--

Names of owners of the >10% Owner Business or Artificial Person ("Second Tier Owner")	Owner's Principal Place of Business Street Address	% of Interest

Name of other >10% Owner Business or Artificial Person:

--

Names of owners of the >10% Owner Business or Artificial Person ("Second Tier Owner")	Owner's Principal Place of Business Street Address	% of Interest

- B. If any Second Tier Owner identified above is an artificial person, the natural or artificial owners of such Second Tier Owner who have held more than 49% of the shares or interest in the Bidder/Offeror/Prospective Contractor (Third Tier Owners) are as follows [if none, please so state]:

Second Tier Owner Name _____

Name of Third Tier Owner	Principal Place of Business Street Address	% of Interest

Affidavit Disclosing Ownership, Influence,
Commissions and Conflicts of Interest
AG Procurement Form 002 (Rev. 11/17/2021)

- C. If the name of no natural person has been identified as an owner, or a Second or Third Tier Owner of the Bidder/Offeror/Prospective Contractor, please identify the name, position, address, and contact information of the natural person having the authority and responsibility for the Bid/Offer/Proposal/Prospective Contract, and the name of any natural person who has the authority and power to remove and replace the designated responsible person:

Name of Natural Person	Position	Street Address of Principal Place of Business	Phone Number, Email Address, and other Contact Information

- D. Further, I say that the persons who have received or are entitled to receive a commission, gratuity, contingent fee or other compensation to solicit, secure, or assist in obtaining business related to the Bid/Offer/Proposal/Prospective Contract for which this Affidavit is submitted are as follows (if none, please so state):

Name	Principal Place of Business Street Address	Amount of Compensation

- E. Further, I say that the persons who have directly or indirectly participated in this solicitation and who are also employees of the government of Guam or the government of the United States, if federal funds are to be used in the payment of the contract related to the Bid/Offer/Proposal/Prospective Contract for which this Affidavit is submitted, are as follows (if none, please so state):

Name	Principal Place of Business Street Address

- F. Regardless of any ownership interest, the following individuals have the power to control the performance of the contract or to control the Bidder/Offeror/Prospective Contractor, directly or indirectly:

Name	Principal Place of Business Street Address

///

///

Affidavit Disclosing Ownership, Influence,
Commissions and Conflicts of Interest
AG Procurement Form 002 (Rev. 11/17/2021)

- G. Until award of the contract, and throughout the term of any contract awarded to the Bidder/Offeror/Prospective Contractor represented herein, I agree to promptly make any disclosures not made previously and update changes in ownership, identities of owners and other required information, interests, compensation or conflicts of the persons required to be disclosed. I understand that failure to comply with this requirement shall constitute a material breach of contract.
- H. I hereby declare under penalty of perjury under the laws of Guam that the foregoing is true and correct.

DECLARATION RE COMPLIANCE WITH U.S. DOL WAGE DETERMINATION

Procurement No.: _____

Name of Offeror Company: Landscape Management Systems, Inc.

I, Robert P. Salas hereby certify under penalty of perjury:

(1) That I am an officer of the offeror [please select one: the offeror, a partner of the offeror, an officer of the offeror] making the bid or proposal in the foregoing identified procurement;

(2) That I have read and understand the provisions of 5 GCA § 5801 and § 5802 which read:

§ 5801. Wage Determination Established.

In such cases where the government of Guam enters into contractual arrangements with a sole proprietorship, a partnership or a corporation ("contractor") for the provision of a service to the government of Guam, and in such cases where the contractor employs a person(s) whose purpose, in whole or in part, is the direct delivery of service contracted by the government of Guam, then the contractor shall pay such employee(s) in accordance with the Wage Determination for Guam and the Northern Mariana Islands issued and promulgated by the U.S. Department of Labor for such labor as is employed in the direct delivery of contract deliverables to the government of Guam.

The Wage Determination most recently issued by the U.S. Department of Labor at the time a contract is awarded to a contractor by the government of Guam shall be used to determine wages, which shall be paid to employees pursuant to this Article. Should any contract contain a renewal clause, then at the time of renewal adjustments, there shall be made stipulations contained in that contract for applying the Wage Determination, as required by this Article, so that the Wage Determination promulgated by the U.S. Department of Labor on a date most recent to the renewal date shall apply.

§ 5802. Benefits.

In addition to the Wage Determination detailed in this Article, any contract to which this Article applies shall also contain provisions mandating health and similar benefits for employees covered by this Article, such benefits having a minimum value as detailed in the Wage Determination issued and promulgated by the U.S. Department of Labor, and shall contain provisions guaranteeing a minimum of ten (10) paid holidays per annum per employee.

(3) That the offeror is in full compliance with 5 GCA § 5801 and § 5802, as may be applicable to the procurement referenced herein;

(4) That I have attached the most recent wage determination applicable to Guam issued by the U.S. Department of Labor. [INSTRUCTIONS - Please attach!]

"REGISTER OF WAGE DETERMINATIONS UNDER THE SERVICE CONTRACT ACT By direction of the Secretary of Labor		U.S. DEPARTMENT OF LABOR EMPLOYMENT STANDARDS ADMINISTRATION WAGE AND HOUR DIVISION WASHINGTON D.C. 20210
Daniel W. Simms Director	Division of Wage Determinations	Wage Determination No.: 2015-5693 Revision No.: 18 Date Of Last Revision: 12/27/2022

Note: Contracts subject to the Service Contract Act are generally required to pay at least the applicable minimum wage rate required under Executive Order 14026.

If the contract is entered into on or after January 30, 2022, or the contract is renewed or extended (e.g., an option is exercised) on or after January 30, 2022:	Executive Order 14026 generally applies to the contract. The contractor must pay all covered workers at least \$16.20 per hour (or the applicable wage rate listed on this wage determination, if it is higher) for all hours spent performing on the contract in 2023.
---	--

The applicable Executive Order minimum wage rate will be adjusted annually. Additional information on contractor requirements and worker protections under the Executive Orders is available at www.dol.gov/whd/govcontracts.

***Workers in this classification may be entitled to a higher minimum wage under Executive Order 14026 (\$16.20 per hour). Please see the Note at the top of the wage determination for more information. Please also note that the minimum wage requirements of Executive Order 14026 are not currently being enforced as to contracts or contract-like instruments entered into with the federal government in connection with seasonal recreational services or seasonal recreational equipment rental for the general public on federal lands.

ALL OCCUPATIONS LISTED ABOVE RECEIVE THE FOLLOWING BENEFITS:

HEALTH & WELFARE: \$4.80 per hour, up to 40 hours per week, or \$192.00 per week or \$832.00 per month

HEALTH & WELFARE EO 13706: \$4.41 per hour, up to 40 hours per week, or \$176.40 per week, or \$764.40 per month*

*This rate is to be used only when compensating employees for performance on an SCA-covered contract also covered by EO 13706, Establishing Paid Sick Leave for Federal Contractors. A contractor may not receive credit toward its SCA obligations for any paid sick leave provided pursuant to EO 13706.

VACATION: 2 weeks paid vacation after 1 year of service with a contractor or successor; and 4 weeks after 3 years. Length of service includes the whole span of continuous service with the present contractor or successor, wherever employed, and with the predecessor contractors in the performance of similar work at the same Federal facility. (Reg. 29 CFR 4.173)

HOLIDAYS: A minimum of eleven paid holidays per year: New Year's Day, Martin Luther King Jr.'s Birthday, Washington's Birthday, Memorial Day, Juneteenth National Independence Day, Independence Day, Labor Day, Columbus Day, Veterans' Day, Thanksgiving Day, and Christmas Day. (A contractor may substitute for any of the named holidays another day off with pay in accordance with a plan communicated to the employees involved.) (See 29 CFR 4.174)

THE OCCUPATIONS WHICH HAVE NUMBERED FOOTNOTES IN PARENTHESES RECEIVE THE FOLLOWING:

1) COMPUTER EMPLOYEES: This wage determination does not apply to any individual employed in a bona fide executive, administrative, or professional capacity, as defined in 29 C.F.R. Part 541. (See 41 C.F.R. 6701(3)). Because most Computer Systems Analysts and Computer Programmers who are paid at least \$27.63 per hour (or at least \$684 per week if paid on a salary or fee basis) likely qualify as exempt computer professionals under 29 U.S.C. 213(a)(1) and 29 U.S.C. 213(a)(17), this wage determination may not include wage rates for all occupations within those job families. In such instances, a conformance will be necessary if there are nonexempt employees in these job families working on the contract.

Job titles vary widely and change quickly in the computer industry, and are not determinative of whether an employee is an exempt computer professional. To be exempt, computer employees who satisfy the compensation requirements must also have a primary duty that consists of:

(1) The application of systems analysis techniques and procedures, including consulting with users, to determine hardware, software or system functional specifications;

(2) The design, development, documentation, analysis, creation, testing or modification of computer systems or programs, including prototypes, based on and related to user or system design specifications;

(3) The design, documentation, testing, creation or modification of computer programs related to machine operating systems; or

(4) A combination of the aforementioned duties, the performance of which requires the same level of skills. (29 C.F.R. 541.400).

Any computer employee who meets the applicable compensation requirements and the above duties test qualifies as an exempt computer professional under both section 13(a)(1) and section 13(a)(17) of the Fair Labor Standards Act. (Field Assistance Bulletin No. 2006-3 (Dec. 14, 2006)). Accordingly, this wage determination will not apply to any exempt computer employee regardless of which of these two exemptions is utilized.

2) AIR TRAFFIC CONTROLLERS AND WEATHER OBSERVERS - NIGHT PAY & SUNDAY PAY: If you work at night as part of a regular tour of duty, you will earn a night differential and receive an additional 10% of basic pay for any hours worked between 6pm and 6am. If you are a full-time employed (40 hours a week) and Sunday is part of your

regularly scheduled workweek, you are paid at your rate of basic pay plus a Sunday premium of 25% of your basic rate for each hour of Sunday work which is not overtime (i.e. occasional work on Sunday outside the normal tour of duty is considered overtime work).

**** HAZARDOUS PAY DIFFERENTIAL ****

An 8 percent differential is applicable to employees employed in a position that represents a high degree of hazard when working with or in close proximity to ordnance, explosives, and incendiary materials. This includes work such as screening, blending, dying, mixing, and pressing of sensitive ordnance, explosives, and pyrotechnic compositions such as lead azide, black powder and photoflash powder.

All dry-house activities involving propellants or explosives. Demilitarization, modification, renovation, demolition, and maintenance operations on sensitive ordnance, explosives and incendiary materials. All operations involving re-grading and cleaning of artillery ranges.

A 4 percent differential is applicable to employees employed in a position that represents a low degree of hazard when working with, or in close proximity to ordnance, (or employees possibly adjacent to) explosives and incendiary materials which involves potential injury such as laceration of hands, face, or arms of the employee engaged in the operation, irritation of the skin, minor burns and the like; minimal damage to immediate or adjacent work area or equipment being used. All operations involving, unloading, storage, and hauling of ordnance, explosive, and incendiary ordnance material other than small arms ammunition. These differentials are only applicable to work that has been specifically designated by the agency for ordnance, explosives, and incendiary material differential pay.

**** UNIFORM ALLOWANCE ****

If employees are required to wear uniforms in the performance of this contract (either by the terms of the Government contract, by the employer, by the state or local law, etc.), the cost of furnishing such uniforms and maintaining (by laundering or dry cleaning) such uniforms is an expense that may not be borne by an employee where such cost reduces the hourly rate below that required by the wage determination. The Department of Labor will accept payment in accordance with the following standards as compliance:

The contractor or subcontractor is required to furnish all employees with an adequate number of uniforms without cost or to reimburse employees for the actual cost of the uniforms. In addition, where uniform cleaning and maintenance is made the responsibility of the employee, all contractors and subcontractors subject to this wage determination shall (in the absence of a bona fide collective bargaining agreement providing for a different amount, or the furnishing of contrary affirmative proof as to the actual cost), reimburse all employees for such cleaning and maintenance at a rate of \$3.35 per week (or \$.67 cents per day). However, in those instances where the uniforms furnished are made of "wash and wear" materials, may be routinely washed and dried with other personal garments, and do not require any special treatment such as dry cleaning, daily washing, or commercial laundering in order to meet the cleanliness or appearance standards set by the terms of the Government contract, by the contractor, by law, or by the nature of the work, there is no requirement that employees be reimbursed for uniform maintenance costs.

**** SERVICE CONTRACT ACT DIRECTORY OF OCCUPATIONS ****

The duties of employees under job titles listed are those described in the "Service Contract Act Directory of Occupations", Fifth Edition (Revision 1), dated September 2015, unless otherwise indicated.

**** REQUEST FOR AUTHORIZATION OF ADDITIONAL CLASSIFICATION AND WAGE RATE, Standard Form 1444 (SF-1444) ****

Conformance Process:

The contracting officer shall require that any class of service employee which is not listed herein and which is to be employed under the contract (i.e., the work to be performed is not performed by any classification listed in the wage determination), be classified by the contractor so as to provide a reasonable relationship (i.e., appropriate level of skill comparison) between such unlisted classifications and the classifications listed in the wage determination (See 29 CFR 4.6(b)(2)(i)). Such conforming procedures shall be initiated by the contractor prior to the performance of contract work by such unlisted class(es) of employees (See 29 CFR 4.6(b)(2)(ii)). The Wage and Hour Division shall make a final determination of conformed classification, wage rate, and/or fringe benefits which shall be paid to all employees performing in the classification from the first day of work on which contract work is performed by them in the classification. Failure to pay such unlisted employees the compensation agreed upon by the interested parties and/or fully determined by the Wage and Hour Division retroactive to the date such class of employees commenced contract work shall be a violation of the Act and this contract. (See 29 CFR 4.6(b)(2)(v)). When multiple wage determinations are included in a contract, a separate SF-1444 should be prepared for each wage determination to which a class(es) is to be conformed.

The process for preparing a conformance request is as follows:

- 1) When preparing the bid, the contractor identifies the need for a conformed occupation(s) and computes a proposed rate(s).
- 2) After contract award, the contractor prepares a written report listing in order the proposed classification title(s), a Federal grade equivalency (FGE) for each proposed classification(s), job description(s), and rationale for proposed wage rate(s), including information regarding the agreement or disagreement of the authorized representative of the employees involved, or where there is no authorized representative, the employees themselves. This report should be submitted to the contracting officer no later than 30 days after such unlisted class(es) of employees performs any contract work.
- 3) The contracting officer reviews the proposed action and promptly submits a report of the action, together with the agency's recommendations and pertinent information including the position of the contractor and the employees, to the U.S. Department of Labor, Wage and Hour Division, for review (See 29 CFR 4.6(b)(2)(ii)).
- 4) Within 30 days of receipt, the Wage and Hour Division approves, modifies, or disapproves the action via transmittal to the agency contracting officer, or notifies the contracting officer that additional time will be required to process the request.
- 5) The contracting officer transmits the Wage and Hour Division's decision to the contractor.
- 6) Each affected employee shall be furnished by the contractor with a written copy of such determination or it shall be posted as a part of the wage determination (See 29 CFR 4.6(b)(2)(iii)).

Information required by the Regulations must be submitted on SF-1444 or bond paper.

When preparing a conformance request, the "Service Contract Act Directory of Occupations" should be used to compare job definitions to ensure that duties requested are not performed by a classification already listed in the wage determination. Remember, it is not the job title, but the required tasks that determine whether a class is included in an established wage determination. Conformances may not be used to artificially split, combine, or subdivide classifications listed in the wage determination (See 29 CFR 4.152(c)(1))."

The Guam Homeland Security Agency/Office of Civil Defense is soliciting price quotations from license and qualified businesses for the procurement of services for the management, collection, and processing via air-burning or shredding/mulching of green waste storm debris as a result of Typhoon Mawar.

ITEM NO.	DESCRIPTION	QTY.	UOM	UNIT PRICE	PRICE EXTENSION
1.0	Air Curtain Burner	350,000	Cubic Yard	\$ _____	\$ _____

Estimated CY minimum of 350,000 and a maximum of 800,000 cubic yard

<u>SPECIFICATIONS:</u>	<u>BIDDING ON/REMARKS:</u>
The air-curtain burner must be a completely assembled and self-sustained container that can be hoisted and secured for portable transportation to designated debris sites.	_____
Minimum average thru put of 3-5 ton per hour.	_____
Air-curtain burner must be always operated by a trained or certified operator.	_____
Bidder is responsible for the transfer and transport of the air-curtain burner to designated debris sites. End-user will coordinate transport schedules and operational times at each debris sited with the vendor.	_____
Air-curtain burner shall, at a minimum, have a three-cylinder diesel engine with approximately 49 horsepower or equivalent engine and shall be emissions certified by the U.S. Environmental Protection Agency of at least Tier 2.	_____
Bidder shall operate the air-curtain burner in accordance with Guam law and all applicable rules and regulations on green waste or clean wood waste as identified by Guam EPA.	_____
Bidder is responsible for the safety and security of the air-curtain burner equipment and all ancillary mechanical parts and materials.	_____
Bidder is responsible for the final disposition of the processed Air Curtain Burner Ash generated to a Guam EPA permitted facility,	_____
Bidder shall prepare and submit a weekly written report to Guam EPA on the waste processed and disposition, to include the following: date and time waste received, village, waste type and volume, processing type (shred, compost or air curtain burner),	
mobile processed green waste and clean wood waste, disposition of processed mobile shredded green waste and clean wood waste.	_____
Bidder shall prepare a written report of the disposition of the mobile air curtain burner and shredder when deployed to the approved village transition sites, Typhoon Debris Management Sites, and Guam EPA designated site.	_____

ITEM NO.	DESCRIPTION	QTY.	UOM	UNIT PRICE	PRICE EXTENSION
2.0	Slow Speed Shredder	350,000	Cubic Yard	\$_____	\$_____

Estimated CY minimum of 350,000 and a maximum of 800,000 cubic yard

SPECIFICATIONS:

The slow speed shredder must be a completely assembled and self-sustained container that can be hoisted and secured for portable transportation to designated debris sites.

Shredder must be able to shred or mulch green waste debris with a minimum average thru put of at least 60 tons per hour, on green waste or clean wood waste as identified by Guam EPA.

Bidder is responsible for the transfer and transport of the slow speed shredder to designated debris sites. End-user will coordinate transport schedules and operational times at each debris sited with the vendor.

Bidder is responsible for the safety and security of the slow speed shredder equipment and all ancillary mechanical parts and materials.

Bidder is responsible for the operation of the shredder equipment and all ancillary mechanical parts and materials to process the green waste and clean wood waste.

Bidder is responsible for the final disposition of the processed green waste and clean wood waste generated to a Guam EPA permitted facility,

Bidder shall prepare and submit a weekly written report to Guam EPA on the waste processed and disposition, to include the following: date and time waste received, village, waste type and volume, processing type (shred, compost or air curtain burner), mobile processed green waste and clean wood waste, disposition of processed mobile shredded green waste and clean wood waste.

Bidder shall prepare a written report of the disposition of the mobile air curtain burner and shredder when deployed to the approved village transition sites, Typhoon Debris Management Sites, and Guam EPA designated site.

Designated Typhoon Debris Disposal Sites:

- Dededo Transfer Station, Dededo
- Ypao Point, Tamuning
- Former Tiyan Carnival Grounds, Barrigada
- Guam EPA Approved Village Transition Sites
- Guam EPA Approved sites, as identified

End User reserves the right to add or remove Designated Typhoon Debris Disposal Sites.

THESE SPECIFICATIONS HAVE BEEN DEVELOPED BY THE GUAM ENVIRONMENTAL PROTECTION AGENCY AND THE GUAM HOMELAND SECURITY AGENCY/OFFICE OF CIVIL DEFENSE:

Prepared by: Michelle Lastimoza, GEPA Administrator

"Revised Specifications 6-17-23"

AIR CURTAIN BURNER: GREEN WASTE: & TREATED/CLEAN WOOD WASTE.

The Guam Homeland Security Agency/Office of Civil Defense is soliciting price quotations from license and qualified businesses for the procurement of services for the management, collection, and processing via air-burning or shredding/mulching of green waste storm debris as a result of Typhoon Mawar.

ITEM NO.	DESCRIPTION	QTY.	UOM	UNIT PRICE	PRICE EXTENSION
1.0	Air Curtain Burner Estimated of 350,000 cubic Yards +/-	350,000	CY	\$ 7.00	\$ 2,450,000.00

Cubic Yard = 3 ft.(W) x 3 ft.(L) x 3 ft.(H) Stock Pile up to 15 ft.

SPECIFICATIONS:

1. The Contractor must possess and submit a copy of their approved Guam EPA permit for processing.
2. The air-curtain burner must be a completely assembled and self-sustained container that can be hoisted and secured for portable transportation to designated debris sites.
3. The air-curtain burner must be able to burn green waste at minimum average thru put of 3-5 tons per hour.
4. The air-curtain burner must be operated by a trained or certified operator according to the permittees approved operations plan.
5. The Contractor is responsible for the transfer and transport of the air-curtain burner to designated debris sites. End-user will coordinate transport schedules and operational times at each debris sited with the vendor.
6. The air curtain burner shall at least be emissions certified by the U.S. Environmental Protection Agency to the Tier 2 level.
7. The Contractor shall operate the air-curtain burner in accordance with all Guam laws and applicable rules and regulations on green waste or clean wood waste as identified by Guam EPA
8. The Contractor is responsible for the safety and security of the air curtain burner equipment and all ancillary mechanical parts and materials.
9. The Contractor is responsible for all firefighting capability; have a minimum of a 500 gallons water tanker or be hooked up to the public water system; and submit a hazard plan for approval by the Guam Fire Department. The cost of water will be at the expense of the Government of Guam.
10. The Contractor is responsible for the final disposition of the processed Air Curtain Burner ash generated to a Guam EPA permitted facility. The cost of disposal will be at the expense of the Government of Guam.
11. The contractor shall prepare and submit a weekly written log in the form provided by Guam EPA on the volume cubic yard of waste processed and its disposition, to include the following: date, type and volume of waste processed, processing type (shred or burn).
12. The Contractor will be responsible for removing any contaminants from the green waste and dispose of it at the appropriate Guam EPA permitted facility. The cost of the disposal will be at the expense of the Government of Guam.

ITEM NO.	DESCRIPTION	QTY.	UOM	UNIT PRICE	PRICE EXTENSION
2.0	Shredder Estimated of 350,000 cubic Yards +/-	350,000	CY	\$ 6.00	\$ 2,100,000.00

Cubic Yard = 3 ft.(W) x 3 ft.(L) x 3 ft.(H) Stock Pile up to 15 ft.

SPECIFICATIONS:

1. The shredder must be a completely assembled and self-sustained container that can be hoisted and secured for portable transportation to designated debris sites.
2. The Contractor is responsible for the transfer and transport of the shredder to designated debris sites. End-user will coordinate transport schedules and operational times at each debris site with the vendor.
3. The Contractor is responsible for all firefighting capability; have a minimum of a 500 gallon water tanker or be hooked up to the public water system; and submit a hazard plan for approval by the Guam Fire Department. The cost of water will be at the expense of the Government of Guam. *Same 1.0 + 2.0*
4. The Contractor is responsible for the safety and security of the shredder equipment and all ancillary mechanical parts and materials.
5. The Contractor is responsible for the operation of the shredder equipment and all ancillary mechanical parts and materials to process the green waste and treated/clean wood waste. The shredded green waste material must be 2" minus
6. The Contractor is responsible for the final disposition of the processed green waste and treated/clean wood waste generated to a Guam EPA permitted facility. The cost of disposal will be at the expense of the Government of Guam
7. The Contractor shall prepare and submit a weekly written log to Guam EPA on the volume of waste processed and its disposition, to include the following: date, type and volume of waste processed, processing type (shred or burn). If burned, identify where the ash is disposed.
8. The Contractor shall use Tekken (Chamoru) fishing nets to cover piles/ mounds of mulch at the end of each work day with dimensions of 1cm to 1cm of nylon filament. DoAg reserves the right to inspect for compliance.
9. If Contractor chooses to compost on-site, only active composting is allowed. The contractor is responsible for turning on compost piles twice a week and monitor temperature with long temperature probes and with appropriate record keeping.
10. To support our local farmers, Department of Agriculture shall obtain Up to 10,000CY of processed green waste material. Prior to release of the processed material, a final survey for Little Fire Ants in and around mulch piles will be conducted by Department of Agriculture. (The processed green waste material will be delivered to DoAg at the expense of the Government of Guam)
11. Contractor must possess a valid Solid Waste Processing Permit from Guam EPA.

Alcon,

Attached for your reference. Solid Waste Management Facility Permit No. 21-003 PRO for LMS Mobile Unit and renewal letter received Jan. 12, 2023.

Guam EPA received the permit renewal application for SWMF No. 21-003 PRO on Jan. 12, 2023. As indicated in item no. 11 of SWMF permit No. 21-003 PRO. Once a renewal application is submitted to Guam EPA, the applicant may continue to operate under the existing permit during the Guam EPA application review process or as directed by Guam EPA.

LMS may continue to operate its mobile unit SWMF permit No. 21-003 PRO during this review period. If you have any questions regarding this matter, please contact me.

Good Morning Glenn,

We have a few questions about our permit because one of our customers is needing some information to present to NAVFAC.

They would like to know the status of the renewal of our Mobile Processing permit 21-003PRO

Are we able to continue to operate while we are awaiting the approval of the new permit?

I have also attached the documents we submitted for the renewal.

Regards,

Ruben Montalvo

"Revised Specifications 6-17-23"

AIR CURTAIN BURNER: GREEN WASTE; & TREATED/CLEAN WOOD WASTE.

The Guam Homeland Security Agency/Office of Civil Defense is soliciting price quotations from license and qualified businesses for the procurement of services for the management, collection, and processing via air-burning or shredding/mulching of green waste storm debris as a result of Typhoon Mawar.

ITEM NO.	DESCRIPTION	QTY.	UOM	UNIT PRICE	PRICE EXTENSION
1.0	Air Curtain Burner Estimated of 350,000 cubic Yards +/-	350,000	CY	\$ 25.00	\$8,750,000.00

Cubic Yard = 3 ft.(W) x 3 ft.(L) x 3 ft.(H) Stock Pile up to 15 ft.

SPECIFICATIONS:

1. The Contractor must possess and submit a copy of their approved Guam EPA permit for processing.
2. The air-curtain burner must be a completely assembled and self-sustained container that can be hoisted and secured for portable transportation to designated debris sites.
3. The air-curtain burner must be able to burn green waste at minimum average thru put of 3-5 tons per hour.
4. The air-curtain burner must be operated by a trained or certified operator according to the permittees approved operations plan.
5. The Contractor is responsible for the transfer and transport of the air-curtain burner to designated debris sites. End-user will coordinate transport schedules and operational times at each debris sited with the vendor.
6. The air curtain burner shall at least be emissions certified by the U.S. Environmental Protection Agency to the Tier 2 level.
7. The Contractor shall operate the air-curtain burner in accordance with all Guam laws and applicable rules and regulations on green waste or clean wood waste as identified by Guam EPA
8. The Contractor is responsible for the safety and security of the air curtain burner equipment and all ancillary mechanical parts and materials.
9. The Contractor is responsible for all firefighting capability; have a minimum of a 500 gallons water tanker or be hooked up to the public water system; and submit a hazard plan for approval by the Guam Fire Department. The cost of water will be at the expense of the Government of Guam.
10. The Contractor is responsible for the final disposition of the processed Air Curtain Burner ash generated to a Guam EPA permitted facility. The cost of disposal will be at the expense of the Government of Guam.
11. The contractor shall prepare and submit a weekly written log in the form provided by Guam EPA on the volume cubic yard of waste processed and its disposition, to include the following: date, type and volume of waste processed, processing type (shred or burn).
12. The Contractor will be responsible for removing any contaminants from the green waste and dispose of it at the appropriate Guam EPA permitted facility. The cost of the disposal will be at the expense of the Government of Guam.

Danica,

According to Manhita Farms, LLC. SWMF Permit No. 16-026PRO, Item No. 11. "Submit SWMF Permit renewal application sixty(60) days prior to the expiration date. During the Guam EPA permit renewal review SWMF may continue to operate".

This allows the Manhita Farms to operate while the permit is being reviewed or as stated by Guam EPA.

If you have any questions please let me know.

PERMIT NUMBER
21-030 PRO

TODO Y NILALA Y TANO MAN UNO
ALL LIVING THINGS ON THE EARTH ARE ONE

SOLID WASTE MANAGEMENT PERMIT

This permit is hereby issued to
Manhita Farms, LLC.
and authorizes the operation of a

Compost Facility

Lot 10154-4, Yigo, Guam

In accordance with the Title 22, Guam Administrative Rules and Regulations (GARR) Division IV, Chapter 21, Solid Waste Collection Regulations (SWCR), Title 22, GARR, Division IV, Chapter 23, Guam's Solid Waste Disposal Rules and Regulations (GSWDRR) and Title 10, Guam Code Annotated, Chapter 51, Solid Waste Management and Litter Control Act, (SWMCA)

This permit authorizes the processing - composting of green waste, untreated wood waste, paper, and cardboard. This permit is non-transferable and conditioned upon the holder observing the government code of Guam and all rules, regulations and orders of the Guam Environmental Protection Agency. No person shall willfully deface, alter, forge, counterfeited or falsify this permit. Any such activity shall cause the immediate revocation of this permit. The renewal application for this permit shall be submitted to the Guam Environmental Protection Agency a minimum of sixty (60) calendar days prior to the expiration date. This permit must be displayed at the location of operation.

EXPIRATION DATE:

Acronym Legend:

Guam EPA = Guam Environmental Protection Agency

GSWDRR = Guam Solid Waste Disposal

N/A = Not Applicable

SWMLC = Solid Waste Management and Litter Control

Rules and Regulations

OSHA = Occupational Safety and Health Administration

CY/Day = Cubic Yards per day

CY/Mon= Cubic Yards per month

ft. = Feet

ft² = Sq. feet

t= Tons

Tbd= To be determined

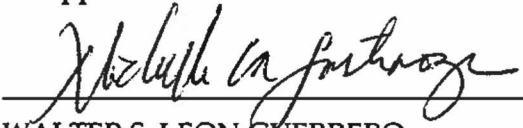

tpd = Tons Per Day

tpm= Tons per month

pwk= Per Week

m² = Sq. meters

MSW= Municipal Solid Waste

<p>6. Approval:</p>  <p>WALTER S. LEON GUERRERO Administrator</p>	<p>7. Guam Environmental Protection Agency 17-3304 Mariner Avenue Barrigada, GU 96913</p>
<p>8. Received by Guam EPA: April 30, 2021</p>	<p>9. Permit Issue Date: NOV 23 2021</p>
<p>10. Permit Expiration Date: August 31, 2026</p>	<p>11. Other: Submit SWMF Permit renewal application sixty (60) days prior to expiration date. During the Guam EPA permit renewal review SWMF may continue to operate. If SWMF renewal applications is submitted after 60 days upon expiration of the permit SWMF must cease operations until a permit is issued or as indicated by Guam EPA.</p>
<p>12. Additional Location Information (i.e. parcel/tract/lot number, municipality): The permitted area is approximately <u>5 acres</u> of the portion of that parcel of land described as, <u>Lot No. 10154-4 Yigo, Guam.</u> (Section 23104(e) of GSWDRR)</p>	
<p>13. Findings:</p> <ul style="list-style-type: none"> a. This permit is consistent with Solid Waste Management and Litter Control, 10 GCA, Chapter 51 and Guam Solid Waste Disposal Rules and Regulations (GSWDRR). b. The design and operation of the facility is in compliance Section 23104 of GSWDRR. 	
<p>14. Prohibitions:</p> <p>The Permittee is prohibited from accepting and processing any waste stream not identified on this permit. The Permittee is prohibited from performing or allowing the following activities: 1) Open burning; 2) Public Scavenging; 3) Disposal of MSW.</p> <ul style="list-style-type: none"> a. Materials shall be screened while they are being loaded into the receiving vehicles and prior to entering the Composting facility. Unacceptable waste will be removed from the Composting area, and removed from the site to an approved Guam EPA permitted disposal facility and managed under other applicable laws and regulations.(Section 23104(e) of GSWDRR) 	

- b. The permittee is restricted from collecting the following individual waste categories at this facility: (Section 23302(c)(4)(A,B,C,D) of GSWDRR)
- i) Hazardous wastes, infectious wastes, biological wastes, radioactive wastes, medical wastes, liquid wastes, asbestos; and
 - ii) Animal carcasses and offal, putrescible animal (unless approved by Guam EPA in writing); and
 - iii) Glass bottles, tires and other rubber and synthetic products, household wastes, treated lumber, construction demolition debris (concrete rubble, tile, asphalt and like waste; and
 - iv) Mattresses and box springs, clothing, cloth and bedding, appliances and furniture, lighting fixtures, lead-based paint, septic tank pumping, sewer sludge and other sludge, waste oil, and other petroleum products and miscellaneous trash and litter; and
 - v) Computer equipment such as, monitors, hard drives, keyboards, etc.
 - vi) Demolition and Construction Debris:
 - (1) Bricks, Concrete Masonry, Stones, Rocks, Asphalt, Paving Materials, light lumber residuals attached to concrete debris, light metal materials attached to concrete debris;
 - (2) Rubble resulting from construction, remodeling, repair, or demolition operations on pavements, houses, commercial building, and other structures;
 - (3) Clay, limestone, coral, and similar waste;
 - (4) Rock and soil or similar unwanted material; and
 - (5) Plastics and fiber glass material and similar waste.
- c. A list of the aforementioned authorized waste shall be displayed prominently at the Facility entrance. (Section 23302 of GSWDRR) under, "Item 15. Authorized Waste" section of this permit.

Removal of any excluded waste that may be encountered during the screening process shall be conducted in accordance with the Operations Plan, this permit, and all applicable state and federal regulations.

15. Authorized Waste: "Non-hazardous"

- A. Untreated wood wastes, green waste, paper and cardboard.

18. CONDITIONS:

a. GENERAL CONDITIONS

i) Posting of Permit:

Upon granting an approval of a permit, the Administrator shall issue to the applicant a permit certificate which shall be posted in a conspicuous place at or near the operation site for which the permit was issued. (Section 23104(n) of GSWDRR)

ii) Falsifying or Altering Permit:

No person shall knowingly deface, alter, forge, counterfeit or falsify a permit. Any such activity shall bring about immediate revocation of the permit. (Section 23104(o) of GSWDRR)

iii) Transfer of Permit:

This permit is non-transferable, whether by operation of law or otherwise, either from one location to another, from one solid waste disposal facility to another, or from one person to another, without written approval of the Administrator. (Section 23104(l) of GSWDRR)

iv) Termination of Operations:

Sixty (60) days prior to closure, any person issued a permit shall report the permanent termination of a solid waste processing, storage or transfer facility for which the permit has been issued to the Administrator and within thirty (30) days after closure surrender the permit to the Administrator. (Section 23104(m) of GSWDRR)

v) Operations:

- (1) The Administrator may order immediate closure of any solid waste management facility if the facility poses a major threat to human health and the environment, or any non-compliance of the requirements of this permit. Such action is at the sole discretion of the Administrator (Section 23104(m) of GSWDRR)
- (2) The Permittee shall notify Guam EPA in writing, of any replacement or addition of machine(s), equipment(s), or mobile or non-mobile building(s) by this facility within five (5) days of any such replacement or addition. (Section 23104(e) of GSWDRR)
- (3) The Permittee shall request approval from Guam EPA in writing, and obtain Guam EPA approval if required by Guam EPA for any additional waste items to be processed in this facility at least fifteen (15) days prior to the anticipated activity. (Section 23104(e) of GSWDRR)
- (4) The Permittee shall inform Guam EPA in writing of any amendments to the facility and its operations on the aforementioned lot described herein at least fifteen (15) days prior to said change and obtain Guam EPA approval prior to amendments of the facility and its operations. (Section 23104(e) of GSWDRR)
- (5) The Permittee shall have a contingency plan to address the retrieval and disposal of regulated waste in accordance to state and federal regulations. This plan shall be made accessible to employees. This plan shall be submitted to Guam EPA prior to the commencement of facility operations. (Section 23104(e) of GSWDRR)

**GUAM EPA SOLID WASTE MANAGEMENT
PERMIT: COMPOST**

Facility/Permit Number: 21-030 PRO-Compost
Manhita Farms LLC.

- (6) The construction and operation of a solid waste management facility shall not cause or contribute to the taking of any endangered or threatened species of plant, fish, or wildlife and shall not cause the destruction of the critical habitat of endangered or threatened species. The Permittee shall submit documentation of compliance with this requirement prior to the effective date of this permit. (Section 23402(d) of GSWDRR)
- (7) The design, construction, and operation of a solid waste management facility shall not restrict the flow of the base flood, reduce the waste water storage capacity of the floodplain, or result in the washout of solid waste so as to post a hazard to human life, or land or water resources. The Permittee shall submit documentation of compliance with this requirement prior to the effective date of this permit. (Section 23402(e) of GSWDRR)
- vi) Waste Limitation: This facility is a SWMF, and is thus subject to the following waste handling requirements. (Section 23104(e) of GSWDRR)
- (1) All acceptable waste shall be placed in the designated area, except for under emergency conditions, and with prior approval of Guam EPA, with the exception of those wastes separated out through the screening process for recycling or alternate disposal, and as specified below. (Section 23104(e)(4) of GSWDRR)
- a) The Permittee shall not accept waste tires and/or batteries. However, if tires and/or batteries are found through the screening process; no more than ten (10) tires per month shall be palletised and covered with leak proof material; and no more than ten (10) batteries per month shall be stored, and disposed of in accordance with all applicable state and federal regulations.
 - b) Other Prohibited Waste: (See section 14 of this permit) that is found through the screening process shall be separated and removed daily to a Guam EPA permitted or approved disposal facility.
 - c) Petroleum Products and Oil based Paints found through the screening process shall be separated and removed daily to a Guam EPA permitted or approved disposal facility.
- vii) Waste Exceedance: The Permittee shall comply with the following requirements should the Facility meet the maximum processing capacity of solid waste as established in Permit Special Condition B: (Section 23104(e) of GSWDRR)
- (1) The permitted processing capacity of this facility is one hundred forty (140) cubic yards daily. No more than one hundred forty (140) cubic yards of unprocessed waste is allowed at any given time and only such waste shall be allowed to be accepted into this Facility. (Section 15 of this permit).

**GUAM EPA SOLID WASTE MANAGEMENT
PERMIT: COMPOST**

Facility/Permit Number: 21-030PRO-Compost

Manhita Farms LLC.

- (2) To handle peak waste flow, the SWMF may accept up to 20% more than the limit of the permit per month, provided the other provisions of this permit are met. If the SWMF shall exceed any given month, the Permittee shall notify Guam EPA in writing and indicate how this waste was handled in compliance with the permit and or amend permit to accommodate facility needs.
- (3) The facility may not accept more than the amount listed in this permit without prior written approval from Guam EPA.
- a) A waste bin and/or a roll off container shall be made available for screened waste. The Permittee shall ensure that waste is directly transferred and disposed at a Guam EPA approved/ permitted solid waste management facility, and shall notify Guam EPA in writing within five (5) working days with the following information:
 - b) The date for which the transfer and alternate disposal occurred;
 - c) The volume and source of solid waste that was disposed alternately; and
 - d) Documentation, such as gate receipts, to indicate the disposal location, tonnage/cubic yards, and date.
- viii) Hours of Operations: See Section 5.b. of this permit (Section 23104(e) of GSWDRR)
- ix) Variance to operating hours will be only as approved by the Administrator in writing. A request for a variance to operating hours must be submitted in writing by the Permittee at least seven (7) days prior to the date such variance is needed. Such request must list the duration, reason for, and hours of operation under the variance. Variance can only be granted for up seven (7) days. (Section 23104(e) of GSWDRR)
- x) Safety:
- (1) The following safety precautions and procedures shall be employed at the SWMF during operations. (Section 23104(e) of GSWDRR)
 - a) The Operator shall prepare a Site Safety Plan that addresses operational safety for on-site personnel, waste unloading and facility personnel, visitors, and regulatory agency representatives who may visit the site. This plan shall be provided to Guam EPA prior to commencement of operations at the Processing-Composting facility and kept on-site in an accessible location. It shall also be updated as needed for any changes in operation, Compliance with OSHA and other safety standards is the sole responsibility of the Permittee and this permit section shall in no way constitute a transfer of change in responsibility and requirements for site safety.
 - b) All individuals shall wear personal safety equipment such as hard hats, gloves and footwear while on the site, as indicated under applicable OSHA law and the Site Specific Safety Plan.

**GUAM EPA SOLID WASTE MANAGEMENT
PERMIT: COMPOST**

Facility/Permit Number: 21-030PRO-Compost

Manhita Farms LLC.

- c) Safety devices, including but not limited to such items as rollover protective structures, seatbelts, and audible reverse warning devices, shall be provided on all equipment used at the facility.
 - d) Fire extinguishers shall be provided and be located within the immediate vicinity of the working area. Provisions shall be made to extinguish any fires which occur on site.
 - e) Communications equipment shall be available on-site for emergency situations.
 - f) Access to this facility shall be controlled and shall be accessible only when operating individuals are on duty.
- (2) Open burning of solid waste is not authorized at the site. (Section 51110(8) of SWMLC, 10 GCA, Chapter 51)
- xi) Ownership of Waste: All solid waste received at this solid waste management facility shall become the property of the facility owner and operator. (Section 23104(e) of GSWDRR)
 - xii) Dust Emission Control Plan: The Permittee shall implement the dust emission control measures during its daily operations pursuant to the requirements under §1103.4 of the Guam Air Pollution Control Standards and Regulations and prepare a Dust Control Plan to document this program. The Dust Control Plan shall be submitted to Guam EPA prior to commencement of Processing/Composting operations. This plan shall be made accessible to employees. (Section 23104(e) of GSWDRR)
 - xiii) Vector Control Plan: The Permittee shall have a vector control plan to prevent or control on-site populations of disease vectors using techniques appropriate for the protection of human health and the environment. This plan shall be made accessible to employees. This plan shall be submitted to the Guam EPA prior to commencement of operations of this Processing/Composting site. (Section 23104(e) of GSWDRR)
 - xiv) Litter Control Program: A litter control program shall be implemented to minimize litter at the Processing/Composting facility and prevent its occurrence beyond the property line of the facility. A written Litter Control Plan documenting litter control measures shall be submitted to Guam EPA prior to commencement of operations. (Section 23104(e) of GSWDRR)
 - xv) Emergency Procedures (Fire & Typhoons):
 - (1) Protocols for emergency procedures shall be established and posted at the jobsite as part of an Emergency Plan. The Emergency Plan shall be submitted to Guam EPA at least fifteen (15) days prior to commencement of operations.

**GUAM EPA SOLID WASTE MANAGEMENT
PERMIT: COMPOST**

Facility/Permit Number: 21-030PRO-Compost

Manhita Farms LLC.

- (2) Incorporate into the facility's emergency plan the following:
 - a) In the event of a typhoon, and upon declaration of Condition of Readiness Three (3), ensure storage bins, containers, and or pallets are secured with a cover material such as netting or a type of cover material that is capable of holding down the storage bins, containers, and or pallets and its contents. The cover material shall be properly secured and anchored on all sides.
 - b) All other safety measures shall be taken to secure all loose debris, equipment, and other appurtenances within and around of the facility.
 - (3) All employees shall be trained and required to read and understand emergency procedures prior to being placed in the workplace.
 - (4) In the event of an emergency, efforts must be made to contact appropriate personnel including but not limited to, management, owner, operator, Guam Fire Department, Guam Police, and Guam EPA.
 - (5) An emergency contact list with corresponding contact numbers shall be established and posted at the workplace.
 - (6) In the event of a fire, efforts must be made to extinguish the fire and contact Guam Fire Department and Guam EPA.
 - (7) In the event of a typhoon, and upon declaration of Condition of Readiness 3, ensure the following measures are taken:
 - a) Operations shall cease and the transfer station shall be secured.
 - b) All other safety measures shall be taken to secure all loose debris, equipment, and other appurtenances within and around of the facility.
- xvi) Record Keeping: All records shall be maintained and made available to Guam EPA upon request. The following documents shall be maintained on site or an alternate, yet readily accessible location as approved by Guam EPA in writing prior to the commencement of operations at this facility: (Section 23104(e)(4) of GSWDRR)
- (1) Current Permit with permit application documents inconclusive
 - (2) Operations Plan
 - (3) Emergency Plan
 - (4) Reports required under this permit
 - (5) The Permittee shall maintain the records, copies of manifest, disposal receipts, and all other records and reports for a period of five (5) years and this timeframe is extended automatically during the course of any unresolved enforcement action regarding the facility or as required by the Administrator.

**GUAM EPA SOLID WASTE MANAGEMENT
PERMIT: COMPOST**

Facility/Permit Number: 21-030PRO-Compost

Manhita Farms LLC.

xvii) **Reporting:**

- (1) The Permittee shall prepare and file with the Agency monthly and annual reports on a form acceptable to the Agency. Report formats shall be provided to Guam EPA, as specified in Section 17, "Self-Monitoring," of this permit, or as otherwise specified by Guam EPA under Special Conditions of the permit. Contents of the reports shall comply with Section 23104(e)(4) of GSWDRR and Section 17, "Self-Monitoring," of this permit. Reports shall also be submitted electronically.
- (2) The Annual report shall be submitted electronically within thirty (30) days after the end of the one-year operating period. The annual report will compile all previous monthly reports, and the closeout report will compile all data for the operating period. (Section 23104(e)(4) of GSWDRR)
- (3) All other information/documents required by this Permit or as requested by the Agency.

xviii) **Inspection and Right of Entry:** Pursuant to the SWMLC Section 51106, the Permittee, by accepting this permit specifically allows the Administrator or his/her designee, upon the presentation of credentials or other documents as may be required by law, access to the premises, at reasonable times, where the permitted activity is located or conducted for the purpose of:

- (1) Having access to and receiving copies of any records that must be kept under condition of the permit or regulations
- (2) Inspecting the facility equipment, practices, or operations regulated or required under this permit or regulations, and
- (3) Sampling or monitoring any substances or parameters at any location reasonably necessary to assure compliance with this permit or Agency rules.

xix) **Lease Agreements:** The Permittee shall provide copies of the new and /or renewed Lease Agreements with the landlord and must be current. (Section 23104(e)(4) of GSWDRR)

xx) **Closure Plan:** The Permittee shall prepare and submit a written closure plan that describes the steps necessary to close the processing facility not less than sixty (60) days prior to final closure. (Section 23104(m) of GSWDRR)

xxi) **Financial Assurance:** The Permittee shall maintain the approved financial assurance mechanism at all times throughout the active life of the solid waste management facility, and during the required post closure care period. The amount of funds assured must be sufficient to cover the costs of closure, post-closure, and corrective action for known releases when needed, and shall be made available in a timely fashion when needed. The estimate closure and post-closure care costs for the solid waste management facility shall be updated annually, and the amount of funds assured shall be adjusted as necessary to account for changes to these costs, as well as any corrective actions that may become required under the Solid Waste Management and Litter Control, 10GCA, Chapter 51

(SWMLC, 10 GCA, Chapter 51) and the Guam Solid Waste Disposal Rules and Regulations (GSWDRR). All facility annual reports must contain updated cost estimates and updated information on the status of the financial assurance mechanisms. No financial assurance mechanism required under the Solid Waste Management and Litter Control, 10GCA, Chapter 51 the guarantor unless the Administrator has received written notice thereof and there has been a lapse of one hundred twenty (120) days between receipt of notice and cancellation date.

- xxii) Liability: The Permittee shall be liable during the duration of the permit and twenty-five (25) years after the expiration of the permit for all costs related to health and environmental restoration attributed to the operation of the facility. (Section 51104(a) of SWMLC, 10 GCA, Chapter 51)

b. SPECIAL CONDITIONS

i) Permit Renewal:

- 1) This permit term is for five (5) years and renewal applications must be submitted sixty (60) days prior to expiration. If renewal application is received by Guam EPA, the Composting facility will continue to operate with the approval of Guam EPA until a Solid Waste Management Processing Permit is issued.

ii) Operations:

- 1) The permitted area is approximately 5 acres of the parcel of land described as Lot 10154-4 located in the municipality of Yigo, Guam. (Section 23104(e) of GSWDRR)
- 2) The permitted area is Agricultural as stated on the Department of Land Management's Certification of Designated Zone. (Section 23104(b)(1)(B) of GSWDRR)
- 3) SWMF shall NOT exceed maximum volume of unprocessed, processed, and residual waste at any given time;
- 4) SWMF shall maintain all windrow access and buffer zones;
- 5) SWMF shall NOT accept any of the acceptable waste stream when either composting or mulching equipment is offsite for more than seven (7) days;
- 6) SWMF shall NOT accept any of the acceptable waste stream when either composting or mulching equipment is inoperable;
- 7) SWMF shall have a container, bin, or roll-off bin for the purpose of screening residual unauthorized waste;
- 8) SWMF shall not exceed residual waste as indicated in Item vi of this permit at any given time;
- 9) SWMF shall ensure all unauthorized waste shall be properly disposed every seven (7) days;
- 10) SWMF shall submit a quarterly report of the amount of waste received, processed, and/or reused off site to Guam EPA no later than the following month after the end of quarter;

**GUAM EPA SOLID WASTE MANAGEMENT
PERMIT: COMPOST**

Facility/Permit Number: 21-030PRO-Compost

Manhita Farms LLC.

- 11) It is recommended that the operator(s) of the facility be knowledgeable and abide by all the conditions set forth on this permit for the operation and maintenance of a Composting Facility;
- 12) The permitted machineries, equipment, buildings on the facility shall be the following: (Section 23104(e) of GSWDRR)

<u>Description</u>	<u>Quantity</u>
1. DW 3060k Shredder	1
2. Doppstadt AK530 Grinder	1
3. Front end loader	1
4. Excavator	1
5. Dumptruck	1

iii) Waste Acceptance

- 1) The Permittee shall only accept waste (Section 15 of this permit) generated from Public, Private, and Military properties located on Guam. (Section 23104(e) of GSWDRR)

iv) Composting Facility:

Upon the issuance date of this permit, the Permittee shall implement the following:

- 1) Secure and deny access to unauthorized persons with the use of gates, signs, and personnel identification;
- 2) Warning signs will be placed around the facility that read," CAUTION COMPOSTING FACILITY-UNAUTHORIZED PERSONS KEEP OUT"
- 3) Warning signs shall be legible during daylight from a distance of 25 feet;
- 4) Facility will be locked when not in use;

v) Facility Signs: Upon the Permit Issue Date under Section 9 of this permit, the Permittee shall comply with the following conditions:

- (1) Within two (2) calendar days of the Permit Issue date , post a Professionally designed sign at the entrance of the facility that includes the waste accepted pursuant to Section15 of this permit;
- (2) The sign shall include time and day of operation;
- (3) Permit number and expiration date;
- (4) Emergency contact information;
- (5) Ensure the facility signs are visible and legible from a distance of 12' and not obstructed at any given time.

**GUAM EPA SOLID WASTE MANAGEMENT
PERMIT: COMPOST**

Facility/Permit Number: 21-030PRO-Compost
Manhita Farms LLC.

- vi) Scale Requirements: Upon the Permit Issue Date, the Permittee shall ensure all out-going and in-coming loads of wastes will be inspected and weighed prior to final disposal. All information shall be recorded in accordance with Section 17, "Self-Monitoring," of this permit. For the use of an alternate form of obtaining weight/volume other than a scale a letter request must be made to Guam EPA.

Failure to comply with the aforementioned conditions may result in the suspension or revocation of the Solid Waste Management Facility Permit and issuance of a Notice of Violation and Order of Compliance. The conditions within this permit shall not be construed to apply to any activity, which is inconsistent with other regulatory requirements of Guam. The Solid Waste Management Facility Permit does not relieve the owner/operator from compliance with all other applicable federal and local requirements. The permit holder is responsible to comply with all applicable federal and local permitting requirements.

The authorized representative, by accepting this permit, agrees to all general and special conditions enumerated in this permit.

DANICA CERTEZA, PROJECT MANAGER

RE: SOLID WASTE MANAGEMENT PERMIT –PROCESSING FACILITY

Facility Name: Manhita Farms, LLC.
Type of Facility: Processing: Compost
Property Description: Lot 10154-4, Yigo
Permit Certificate Number: 21-030 PRO/Compost
Expiration Date: Monday, August 31, 2026

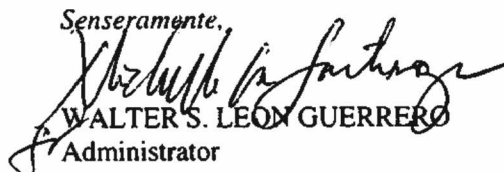

Hafa Adai, Mr. Benito,

On Monday, August 02, 2021, the Guam Environmental Protection Agency completed the public comment period for Manhita Farms, LLC. During the public comment period, Guam EPA did not received any written comments and therefore, hereby issues to Manhita Farms, LLC. the enclosed Solid Waste Management Facility Processing permit No. 21-030 PRO/ Compost.

This permit is issued with the following conditions as required under the Title 22, Guam Administrative Rules and Regulations (GARR) Division IV, Chapter 21, Solid Waste Collection Regulations (SWCR), Title 22, GARR, Division IV, Chapter 23, Guam's Solid Waste Disposal Rules and Regulations (GSWDRR) and Title 10, Guam Code Annotated, Chapter 51, Solid Waste Management and Litter Control, (SWMLC).

Failure to comply with the enclosed permit conditions may result in the suspension or revocation of the SWMF permits and issuance of a Notice of Violation and Order of Compliance.

Should you have any questions regarding this matter or clarification on the enclosed permit conditions, please contact the Solid Waste Management Program at (671) 300- 4751.

Senseramente.

Hafa Adai Anita

See additional questions.

1. Item #2 indicates process by slow speed shredder. Please confirm that processed by high speed grinder also acceptable.
2. Is only clean greewaste going to processed by ACB and shredder and or ginder? If other material will be processed please provide material classification as there are different processes and disposal requirements for other type of materials. A bid line for different material classification per process is also requested if applicable.
3. Is there a size specification for end material from grinding and shredding as there is additional requirement #4 require compost green waste reservation for DoAG?
4. In additional requirement #3 please clarify requirement to mix/turn material for 3 hours before material can leave site? This process will do little if anything to meet intent of this section.

Compost Best Management practices require turning pile 3 times once every 7 day to meet this intent.. This will add tremendous cost in equipment as well as time to turn up to 850,000CY of material 3 x before it can be moved. I recommend this is deleted.

Sincerely
John Limtiaco

Subject: Re: EMERGENCY PROCUREMENT - REQUEST FOR QUOTE

Hafa Adai Anita,

I acknowledge receipt, please provide answers to the following questions:

1. Please clarify what constitutes a "long period of time" as referenced in Item 5 of the Additional Requirements page.
2. Please clarify Item 4 of the Additional Requirements page. Will the 30% remaining compost/mulch remain at the site for the reserved agencies and they will pick it up or will we be required to deliver it and if so where?
3. Please clarify Item 4 of the Additional Requirements page. Can the contractor sub-contract commercial haulers to transport the green waste debris to contractor's permitted site?
4. Please clarify the requirement for the Bidder preparation of reports to Guam EPA that include date and time waste receive, village, waste type etc (shred compost or air curtain burning). The waste government has already started receiving the waste prior to the start of the services. How are we too report on past collections? Is the contractor now going to have to staff personal to now receive at al of the locations listed and keep these records or will this remain the responsibility of the Government.
5. Is the government responsible to provide fire fighting capabilities at each site or is the contractor required to have fire fighting capabilities on site? If contractor is responsible what is the minimum firefighting capability required for each designated processing site? If the contractor is responsible for fire fighting will we have access to a water source in close proximity free of charge or are we required to apply for a temporary meter with GWA?
6. Is the government or the contractor responsible for the tipping fees for the final disposition at Guam EPA Permitted facilities?
7. Are we able to bid for certain areas? Example can we bid Central to Northern sites and no bid other sites?
8. How will the workload be divided? Will it be based on the contractors processing capacity?
9. ACB operations will produce smoke and ash and will impact residences in close proximity to sites. Will the government or contactor be responsible for public notice and fielding complaints?
10. Can the contractor perform operations sequentially or are we required to process multiple sites concurrently?
11. What is the period/timeline of performance to complete the work awarded?
12. What is the funding source for this solicitation and what are the payment terms? How will contractor bill for work completed; upon shredding or ACB processing or after byproduct is moved to contractors permitted site?
13. ACB operations require access control on site. During operational hours will contactor be able to restrict access to site? There are multiple items being accepted at each site. During ACB operations we need to maintain a no access perimeter per GFD requirements. Who will be responsible for securing the site during non-operational hours?

	THIS ORDER IS SUBJECT TO THE FOLLOWING TERMS AND CONDITIONS:						
1.	Acknowledgment copy of this order must be signed and returned advising approximate or definite shipping date.						
2.	No variation in any of the terms, conditions, deliveries, prices, quantity, quality, or specification on this order, irrespective of the wording of the seller's acceptance, will be effective without buyer's written consent.						
3.	Packing list must accompany each shipment, showing our order number, description and part/serial number for each item.						
4.	Shipments must be identified as "PARTIAL" or "COMPLETE".						
5.	Material is subject to buyer's inspection and approval within a reasonable time after delivery; if specifications are not met, material shall be returned at seller's expense.						
6.	In connection with any prompt payment discount offered, time will be computed from date of delivery and acceptance at destination, or from the date the correct invoice or voucher is received in the office specified by the Government of Guam, if the latter is later than date of delivery and acceptance. Payment is deemed to be made, for the purpose of earning discount, on the date of the mailing of the check.						
7.	Overshipments, unless specifically authorized, will not be accepted.						
8.	In connection with bid awards and contracts, this purchase order shall be governed by the Special Provisions and Bid General Terms and Conditions as specified.
